Jeff Martin tugs at his stubborn steer, Big JJ, in the sales ring at New Holland Sales Stables. The 1,025-pound grand champion steer at the New Holland Fair sold for $1 a pound. (See story on page 8 .)

Elwood Houser Has Top Hog Carcass

Elwood Houser, Lebanon RD, had the best hog carcass in competition at the Lampeter Fair last week.

His 198 pound Yorkshire had a carcass length of 30.5 inches, back fat of 1.0 inches, loin eye area of 5.1 square inches and a ham-loin percentage of 42.8.

In on-foot judging, however, the judge placed the top animal sixth.

The second place carcass was shown by Dutch Valley Farm, owned by Mark Nestleroth, Manheim RD3.

The crossbred animal weighed 203 pounds, had a carcass length of 30.3 inches, back fat of 1.3 inches, 5.3 square inches of loin eye, and ham-loin percentage of 41.7. The animal also placed first on foot.

The third place carcass was shown by Leon Arnold, Lebanon. The 190-pound Yorkshire had a carcass length of 29.7 inches, 1.1 inches of backfat, 4.7 square inches of loin eye and ham-loin percentage of 41.2. The animal placed fourth on foot.

Other animals in order of placing were shown by Willow Glen Farm, Strasburg RD1, Robert Armstrong, Drumore RD1; Warren Buch, Lititz RD2; Dave Hostetter, Lancaster RD2, and Ed Kilheffer, Millersville RD1.

This event was sponsored by the Lampeter Fair. A similar carcass judging will be sponsored at the Manheim Fair by the Lancaster County Swine Producers Association.

Manheim Fair Set Oct. 6-8

The Manheim Fair October 6-8 will close out the 1971 Lancaster County Fair season.

At the strictly educational fair, exhibit areas will feature a wide selection of baked goods, canned goods, farm crops, flowers, vegetables, fruits and nuts. Displays will be held at the Harvey Spahr warehouse.

Commercial exhibits and FFA and FHA window exhibits will be located in a tent near the Spahr warehouse.

At the Scout Hall, there will be arts and crafts, fancy work, models and woodwork items.

Tents will house beef cattle, swine, sheep, dairy, poultry and small livestock categories.

Sheep and swine judging will be held at 2:30 p.m. Wednesday.

4-H and FFA Baby Beef Judging will begin at 5 p.m. Wednesday in the large ring outside the beef animal tent.

A highlight for FFA showmen is the beef cattle sale Friday night immediately following the swine sale at about 8:15 p.m. The sale animals were raised by vo-ag students as projects during the past year.

The FFA tractor driving contest will be held at 10 a.m. Friday, followed by the adult tractor driving contest at 2 p.m. All contestants must be residents of the Manheim Central School District. Tractors will be furnished by farm show exhibitors.

A new feature of the fair will be a small tractor and garden tractor pulling contest at 8 p.m. Wednesday following the Baby Beef Show.

The annual parade will be held at 7 p.m. Wednesday.

The dairy show is scheduled for 6:30 p.m. Thursday.

Manheim Fair Schedule

Wednesday, October 6
2:30 p.m. — Sheep and Swine Show
5 p.m. — 4-H and FFA Baby Beef Show
7 p.m. — Community Farm Show Parade
8 p.m. — Tractor Pulling Contest, following Baby Beef Show

Thursday, October 7
6:30 p.m. — Dairy Show

Friday, October 8
10 a.m. — FFA Tractor Driving Contest
2 p.m. — Adult Tractor Driving Contest
8 p.m. — Market Hog Sale
8:15 p.m. — FFA Beef Sale, following Market Hog Sale

Slow Moving Vehicle Law To Be Enforced

There appears to be some misunderstanding on the law just passed concerning the use of the slow moving vehicle emblem.

The provision in the Occupational Health and Safety Act that was passed on August 27, 1971 requires all vehicles, which by design move slowly, 25 miles per hour or less, to use the Slow Moving Vehicle emblem. This means that whether you own the equipment or are a hired hand, the emblem must be on the equipment.

The emblem consists of a fluorescent yellow-orange triangle with a dark red reflective border. The emblem is intended as a unique identification for, and it shall be used only on, vehicles which move 25 miles per hour or less on public roads.

The emblem is transferrable from one vehicle to another so it's relatively inexpensive to provide them for your equipment. If your tractor or machine is equipped with lights - the emblem still must be used.

This triangle gives the message that a slow moving vehicle is ahead.

Lancaster County State Police have said they will begin enforcing this law October 12.

ALL NEW BEACON PULLET CAGE SYSTEM

One day old to twenty weeks, 20 birds per single deck cage. This is the most economical and labor saving system on the market. The automated system includes the winch suspended Beacon auger pan feeder, one pan per 24" x 36" cage, and the Hart cup watering system. Features of single deck pullet cage system from one day old to twenty weeks:

- Only two adjustments—from one day old to twenty weeks
- Safety lock hinged doors
- ½ x 2 galvanized mesh floor
- Sturdy channel suspension or stands
- One or two Hart cups per cage
- One 8" pan per cage
- Winch feeder adjustment
- Can use hot water or hot air heating systems
- Flex auger feeders
- More uniform pullets
- Most advanced engineered chick-pullet system available
- Easy ventilated
- Greater cubic inch of bird area
- Start chicks directly on feeder
- Easy assembly

New York Eggs

Thursday, Sept. 30

Market unsettled. Demand irregular with wholesale buyers unaggressive and limiting purchases to day-to-day needs. Distributors are tending to be free sellers and not refusing reasonable offers with numerous sales at prices to be determined later. Arrivals moderately heavy where distributors were closed Wednesday. Additional offering from the country points plentiful on large, moderate on mediums. Supplies of large plentiful, mediums ample. Carton activity is irregular with movement only fair at best

Fix-It Tip

Acoustical ceiling tiles will do much to deaden the sound in any room. These are available in a 12x12-inch size and are applied by nailing, stapling or using an adhesive. If you are using nails or staples, apply the tiles to 1x3-inch furring strips, which is the method used in new construction. In a finished home, you can cement the tiles directly to the ceiling if it is smooth and level.

Don't Plant Wheat Too Early, Smith Warns

Unless there's an early frost, Lancaster County farmers should not plant fall wheat during the next 10 days, according to Max Smith, county ag agent.

The advice is based on the probability of Hessian fly damage if the planting occurs earlier.

Smith explains that during the past season, the Redcoat wheat variety was found to be damaged by the Hessian fly Always before, farmers who wanted to plant ahead of the first frost could depend on Redcoat to be resistant to the Hessian fly. Now, no resistant varieties are available.

If the wheat is attacked by the fly in the fall, the stalks will lodge and there will be considerable harvesting loss.

October 10 is normally the frost date in Southeastern Pennsylvania. Although last fall was exceptionally warm and the fly probably was still around by November 1, Smith believes planting wheat after October 10—before if there's a frost—will be adequate protection.

But unless there is an early frost, farmers who seed wheat this week and possibly next week are subjecting themselves to possible fly damage, Smith said.

Try Arthur

Meanwhile, Smith is also recommending that farmers interested in wheat try planting some of a new variety called Arthur. Relatively new, the variety is available in limited quantities only.

Other varieties being recommended include Redcoat, Blueboy and Pennoll. None of these, including Arthur, have much fly resistance.

Delveloped by the Purdue University Agricultural Experiment Station, Arthur is a moderately stiff-strawed, plump kerneled, soft red winter wheat, Smith said.

The variety has many of the same characteristics as Redcoat, with nearly the same resistance to leaf rust, powdery mildew and the Hessian fly.

It appears to have better loose smut resistance than Redcoat, he said, and since it is not as stiff-strawed as Redcoat, it should not be Spring topdressed with as much nitrogen as Redcoat on fields where lodging occurs.

The variety has performed well in Pennsylvania and Ohio tests. Straw height is about the same as Blueboy, Smith said, and about three inches shorter than Redcoat.

In trials conducted at six agricultural experiment stations in five counties throughout the state during 1970, Arthur yielded four bushels more than Blueboy and six bushels more than Redcoat.

The tests were conducted in Lancaster, Centre, Columbia, Crawford and Franklin counties.

By 1972, Smith said, local wheat growers will have an opportunity to plant Arthur 71, which is Arthur with improved Hessian fly resistance.

My Neighbors

"I wish there were some way to assure that the end justifies the jeans."

Local Dairymen Attend Conference

Several local dairymen recently completed a two-day dairy conference in Philadelphia.

They include: Robert McSparran, Peach Bottom; Roy H. Book, Ronks, and Daniel L. Martin, Manheim, all local directors of Inter-State Milk Producers' Cooperative, and James Barnett, Don Breiner, Andrew Marvin, Edward Montgomery, Mack Newton and Lewis Springer, fieldmen.

Dr. James E. Honan, general manager of Inter-State Milk Producers' Cooperative, moderated the program for the directors and fieldmen on present milk marketing conditions within Federal Order No. 4. Dr. Paul E. Hand, economist for Inter-State, and Donald Copeland, counsel, discussed Federal milk orders.

The purpose of this two-day conference was to study the current milk marketing situation affecting Federal and state milk marketing orders and the President's price and wage 'freeze' order.

The conference activities included requirements for new farm inspection, screening and milk flavor programs, and a complete review of various types of base and milk quality programs in operation.

Milk pricing was included in the two-day session in relation to the demand for milk and the problem of inflation as it affects dairy farmers.

Field representatives from four states reported milk marketing problems.

Wilbur Seipt, president of Inter-State, presided over the two-day meeting.

FHA to Make Chester Co. Loans

The U. S. Department of Agriculture recently announced that the Farmers Home Administration may receive applications from flood victims on farms and in rural areas in Chester County.

This follows President Nixon's September 17 declaration of a major disaster in the State of Pennsylvania as a result of unusual heavy rains and flooding beginning about September 11.

Farmers Home Administration loans are made to finance crop production, replace livestock, for other expenses necessary to restore normal operations, and to repair or replace damaged dwellings or farm buildings.

Applications from Chester County should be made at the county Farmers Home Administration office at 1383 Arcadia Road, Lancaster, Pa. 17601. Borrowers must have sustained damage from the disaster cited.

Farmers or rural residents who borrow agree to repay their loans as soon as possible consistent with their ability. Loans are secured by liens as required to protect the government's interest.

Now's the Time to Feed Cheap Corn to Hogs, Farmers Are Told

Under current market conditions, feeder pigs are selling at bargain prices, Lancaster County farmers were told this week.

The statement was made by H. Louis Moore, Penn State University farm economist, to Lancaster County farmers attending Moore's annual livestock review and forecast at the Farm and Home Center.

Moore said feeder pigs recently have been selling for $10 a head in the area around Penn State University. At these prices, hog producers can make good returns at recent $22 to $23 per hundred market hog prices, he said.

Even at recently depressed prices of $18 to $19 a head, the farmer stands to hold his own if he can get the feeder pigs at $10, he said

He explained that when farmers were losing money at $18, it was largely because they had paid much more for their feeder pigs and corn prices where high.

When local farmers protested that feeder pigs in this area are going for $12 to $15, Moore said hog producers should still be able to profit, using corn which is expected to be below $1 a bushel.

The situation is not as favorable for beef cattle producers, it was explained, because feeder cattle are selling at fairly high prices in relation to the market prices for the finished animal.

Moore explained that in spite of the threat of Southern corn leaf blight hanging over this year's corn crop, the nation as a whole will probably harvest one of the largest crops ever.

Corn blight, while a serious problem in Lancaster County and this corner of the state during the past growing season, was not a problem in the large corn growing states of the mid-west, Moore said.

Not only will corn be plentiful enough to drive the price down and keep it down, he said, but the nation also produced bumper crops of wheat, barley and sorghum, suitable substitutions for corn as a cattle feed.

Moore saiid United States grain corn should be more competitive on the world market but, he added, other countries have also had good grain crops this year.

He cited lengthy dock strikes as killing farm export trade for the U.S.

He said farmers could expect to realize a larger return for their corn by feeding it to livestock in the coming year.

There is no danger in feeding blight damaged corn to hogs, he said, and recommended doing so rather than taking a loss trying to sell poor quality grain on an already poor market.

Turning to the beef business, Moore said he looks forward to some weakening in the beef market with more animals coming on the market.

Even though people are expected to eat more beef in spite of the price freeze, Moore said he sees a negative margin in feeding beef.

Sticking with his recommendation on hogs, he said that "Most guys who don't buy now will wonder why they didn't"

The first alternative to a bad corn crop, he said, is to feed hogs.

Balmer Wins Tractor Contest

Jesse Balmer, Lititz RD4, was the winner of the adult tractor driving contest at the Ephrata Fair last week.

Other winners were: Glenn Martin, Ephrata RD1, second; Paul Bucher, Lititz RD4, third, and Aaron Stauffer, Ephrata RD1, fourth.

Tom Zartman, contest chairman, awarded trophies to Balmer and Martin, and plaques to Bucher and Stauffer.

Judges were Charles Hackman, Farmersville Equipment Company; Richard Buch, Roy Buch Farm Machinery, Inc., Akron; Kenneth Spade and Lloyd Grubb, International Harvester, Ephrata and Robert Groff, A.B.C. Groff, Inc., New Holland These machinery dealers also provided tractors for the contest

Annual Poultry Banquet Slated

The annual banquet meeting of the Lancaster County Poultry Association will be held at 6:30 p.m. Thursday, October 14, at the Plain and Fancy Restaurant, Bird-in-Hand RD1.

Besides election of four directors, the program will include special music.

The speaker is Enos Heisey, field manager, member and public relations, Agway, Inc. Heisey will give a colored slide presentation on agriculture in Africa.

Tickets are available from any Association director at $3.50 per person or from Irvin Musser, Mounty Joy RD1, and Mrs. Paul F. McGarvey, 379 W. Roseville Road, Lancaster.

Local Grain

Thursday, September 30

These prices are made up of the average prices quoted by six participating local feed and grain concerns. It should be noted, however, that not every dealer handles each commodity. All prices are per bushel, except for ear corn which is per ton.

The average local grain prices quoted Thursday, September 30 are as follows:

	Bid*	Offered
Ear Corn (Old)	40.33	45.66
Ear Corn (New)	22.00	25.00
Shelled Corn	1.27	1.48
Oats (local)	.72	.82
Barley	1.00	1.25
Wheat	1.40	1.55

*Bid is the price the dealer will buy from the farmer delivered to the mill. Offered is the price the dealer will sell for at his mill.

Your fair share - a day's pay or more - will make for a better community, a better-serviced County, a successful campaign, and (best yet) a clear conscience.

Let the sunshine in...

Love

A LONELY OLD LADY

There's nothing to disturb her peaceful, patterned life. Not even a visitor.

She spends long, lonely hours thinking of the past and of those loved so dearly. Why don't they come? Just one hour would help. Even a few minutes.

She has a daughter — somewhere. A son, too. But they're too busy leading their own lives. There just isn't time for "Mom." Her brother can't make it either. He's old, too . . . and lonely.

The United Way has volunteers who bring a little sunshine into those bleak, lonely hours and leave a little love behind. The aged, the disturbed, the handicapped, the ill depend on you.

Jeff Martin Has Champion Steer at New Holland Fair

Thirteen-year-old Jeff Martin, New Holland RD1, had the grand champion steer at the Lancaster 4-H Baby Beef Club show at the New Holland Fair Thursday

The 1,025 pound Hereford later in the day was bought by the Frank Steller and Robert Martin Auction Service, Leola, for $1 a pound or a total of $1,025 in the sale at the New Holland Sales Stables.

Reserve grand champion was a 995 pound Angus shown by Twila Snader, East Earl RD1. H. D Matz, local cattle dealer, paid 54 cents for the animal.

The champion and reserve animals were both first in their breed classes.

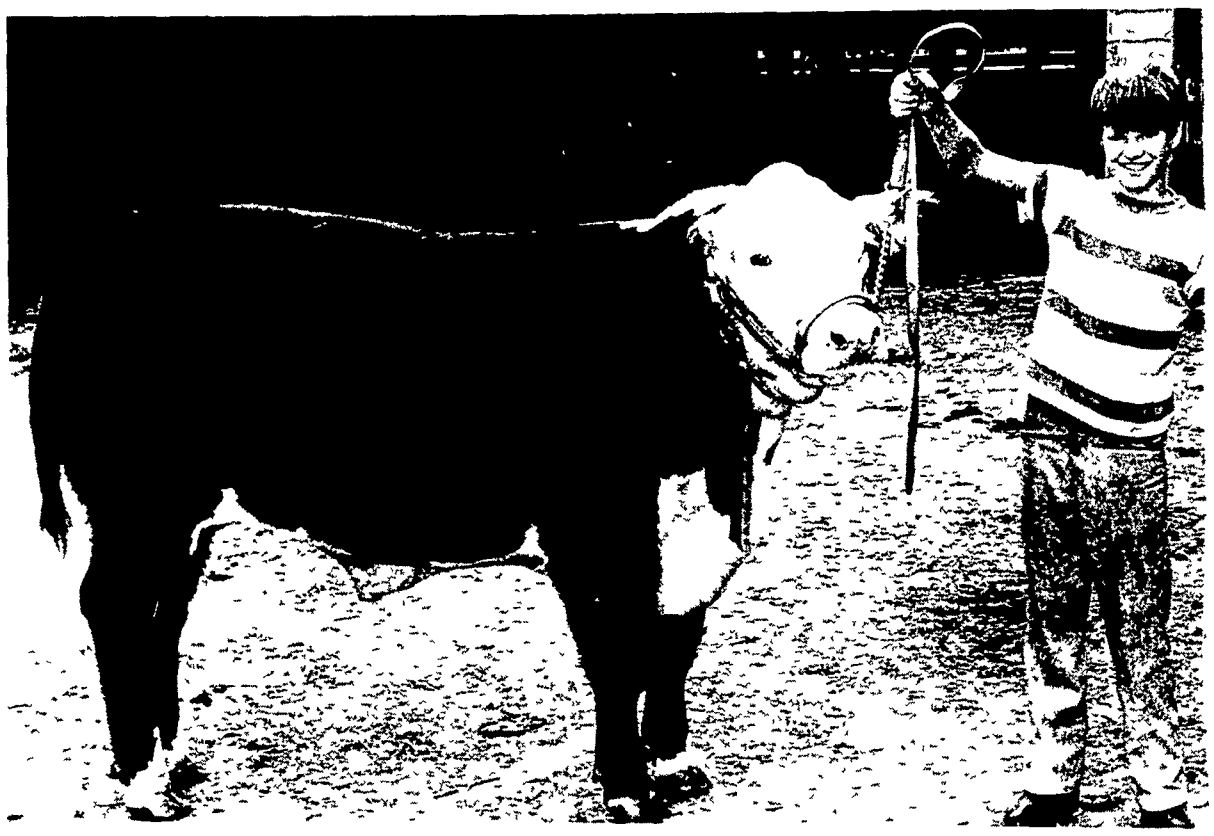
The second place Angus, owned by Cindy Yoder, Elverson RD1, was bought by New Holland Meat Market for 51 cents a pound.

Joseph Weaver, Gap RD1, had the second place Hereford, bought by New Holland Sales Stables for 44½ cents a pound.

Altogether, there were 17 animals sold. Bidding was brisk and, not including the grand champion, the average price was 50.70 cents per pound.

Other buyers paying well above market price for the 4-H animals which sold for 40½ to 62 cents a pound were: G. S. Sensenig store, New Holland RD1; C. B. Hoober and Son, Intercourse; Weaver Martin trucking; Leola National Bank; New Holland Farmers National Bank; John J. Hoober feeds, Gordonville, Earl Sauder Feeds, New Holland; Lapps Meats, Kinzer; New Holland Supply Co., and Hurst's Tire Service, East Earl RD1.

The New Holland Sales Stables assumed all costs of the sale, as well as trucking the animals.



Jeff Martin shows his grand champion steer, a Hereford named Big JJ, at the New Holland Fair Thursday.

Jeff Martin and his New Holland Fair grand champion steer, Big JJ.

Charolais Show, Sale Set at Vintage

The Vintage Sales Stables has scheduled a Charolais Show and Sale Friday, October 8.

The show, including cash prizes and trophies, will be held at 2 p.m. and the sale at 7 p.m.

Ken Hershey, Vintage Sales Stables manager, said he anticipates about 100 head of animals in the show and about 500 head in the sale.

The judging will consist of pens of five steers, with one pen per entry. The Colonial Charolais Association will award a $50 savings bond for the first place pen and a $25 savings bond for the second place pen.

The Sales Stables will give first, second and third place trophies.

Loren Conner, manager of the Mal Allen Charolais Farm, Rahns, Pa., will be the judge.

"Bloody Mary"

England's Queen Mary I, who reigned in the 16th century, was called "Bloody Mary" because of the religious persecutions that occurred during her reign.

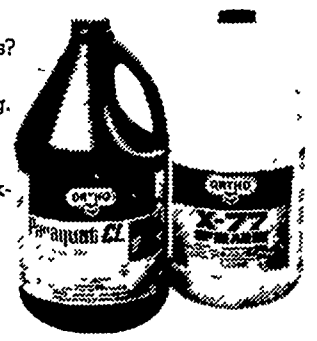
THE ORTHO, CHEVRON DESIGN, HELPING THE WORLD GROW BETTER—REG U S PAT. OFF.
ON ALL CHEMICALS READ CAUTIONS, WARNINGS AND DIRECTIONS BEFORE USE.

No Tillage is nothing without a good winter cover crop.

Establishing a vigorous winter cover crop each fall is a key factor in turning out top yields in a no tillage program. This is true even if last year's crop was planted in a perennial sod. A mulch lasts only one season, so a freshly killed cover is necessary each spring.

The heavier the mulch, the more moisture it will trap for roots to tap next summer. It'll also keep soil erosion and surface evaporation of moisture at a minimum. There are four things to look for when choosing a winter cover crop: (1) Ease of establishment, (2) Winter hardiness, (3) Ease of killing with a herbicide, (4) Persistence of dead mulch. (Check with your seed supplier or soil conservation service for information on cover crops recommended for your area.)

Once your cover crop is established, keep in mind that it doesn't pay to graze or harvest it for hay or silage. Stubble left after harvest won't provide enough protective mulch. In one university test, for example, corn planted into a vigorous sod yielded 47% more than corn planted into stubble.



Why are we telling you all this? Because we want you to know everything about no tillage farming. And that's why we also want you to use the best product you can to give quick kill and fast knockdown of any cover crop.

That's ORTHO PARAQUAT. Proven to be the best herbicide developed for No Tillage Farming.

Poultry Processors Discuss Legislation

At the recent meeting of the Pennsylvania Poultry Processors Association William D. LaCour, Planning Analysis, Solid Waste Section, Bureau of Housing and Environmental Control reported on Act 241 (as ammended), Pa., Solid Waste Management Act.

He stated that beginning January 1970, the Act officially required permits for all solid waste disposal.

"The Module, which was mailed to members, should be completed by a qualified individual such as a geologist, soil scientist or hydrology scientist. The specialist is necessary, because background data on soil and geology of the area is required."

An explanation of some of kthe requirements were offered and those in attendance received handout material on the subject.

The material included a copy of Act 241, Instructions - Ground Water Report, Rules and Regulations for Administration of the Pennsylvania Solid Waste Management Act, and list of Solid Waste Cordinators and the counties serviced.

President Gene Bailey reported that action on the Occupational Health and Safety Act will come from the Penna. Dept. of Labor and Industry. Inasmuch as they consider the poultry processing as a high risk industry, emphasis will be placed early on compliance.

President Gene Bailey reviewed the Proposed Poultry Inspection Regulations with the members.

Upon completion of the review President Bailey requested members to review the regulations further. If there were any questions or suggestions, give Gene Bailey and E J. Lawless authority to submit recommendations All of this was to be done by September 25, 1971, because October 1 is the deadline for comments in Washington, D C

Special attention was called to the proposal relating to withdrawal of inspection service The group went on record objecting to the proposal to furnish warm water to inspectors

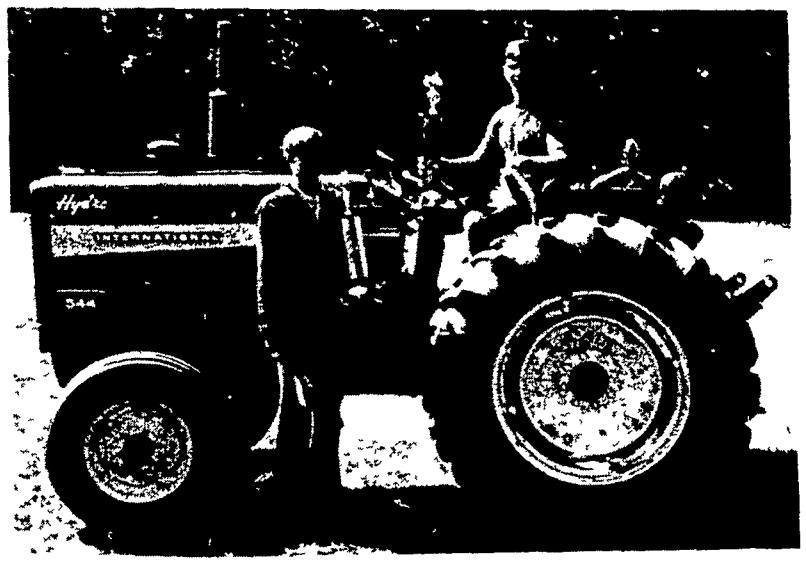
The U S Sisk Bill and the Pa. Senate Bill 892, having to do with bargaining, were discussed briefly It was suggested that the Association send another letter to the Pennsylvania Legislators clarifying two areas in the previous letter

The high rate of broiler condemnation in Pennsylvania was discussed Apparently some progress has been made since the previous meeting, but the problem deserves further exploration

A request was made to send copies of the pamphlet prepared by N B C titled - "How Growers Would Really Fare Under Compulsory Bargaining"

The meeting adjourned at approximately 3 p m Notes from which the minutes were prepared were generously taken by Kermit Birth

E J Lawless Jr
Secretary



Doug Rohrer, winner of the FFA tractor driving contest at Ephrata Fair, is seated and the runner-up, Bill Krantz, is standing.

Rohrer Wins FFA Tractor Driving

Doug Rohrer, Lititz RD2, was winner of the Lancaster-Chester Area FFA Tractor Operation contest last week at the Ephrata Fair.

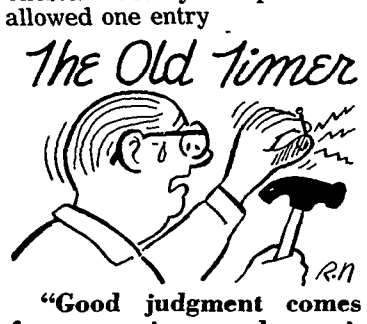
He will represent the area next Summer in state-wide competion at Pennsylvania State University.

Second place in the contest went to William Krantz, Quarryville RD2, and third to Glenn Yoder, Christiana RD1, Chester County. James Weaver, Ephrata RD1, took fourth place.

Trophies were awarded to the top two winners with plaques going to third and fourth place.

The four-part event involves demonstration driving in which a manure spreader is pulled through an obstacle course and then backed into a stall with only three inches clearance on either side, a written test on safety and maintenance; a tractor trouble shooting exercise and a tractor maintenance demonstration.

The tractor operation contest is an annual FFA event in which each of the nine Lancaster County chapters and three Chester County chapters are allowed one entry



"Good judgment comes from experience and experience comes from poor judgment."

Keep Harvest Losses Down

It's harvest time again for the important corn crop and other late crops.

Farmers who have carefully followed all the best management practices through the season in an effort to get top yields should not overlook the harvest itself as a possible yield reducer.

Our reports indicate, for instance, that as much as 15 bushels per acre of corn can be left in the field because of improper harvesting practices.

Clifford M. Hardin, U. S. Secretary of Agriculture, recently noted that soybean producers leave an average of one bushel out of every 10 of soybeans in the field, at a cost nationally of more than $350 million a year. Hardin stated that two-thirds of this loss can be avoided.

A 15 per cent harvest loss can mean as much as 10 to 20 bushels per acre of corn left unharvested in the local area. When we consider that Lancaster County has nearly 150,000 acres of corn, the potential size of the harvest loss becomes staggering.

In commenting on the soybean loss, Secretary Hardin pointed out that with the typical production of 30 bushels of soybeans per acre, the loss is usually about three bushels per acre. If two-thirds of the loss is saved through improved soybean harvest managemtn, it could mean a saving of $6 or more an acre.

Similar or even greater savings can be achieved on many local corn fields. Making sure that the harvesting equipment is properly adjusted and working smoothly, that the crop is harvested at the proper time, that the equipment is operated at the proper speed and other simple, but essential, management practices will be amply rewarded at harvest time.

Be Safe at Harvest Time

Danger is never far away from the farmer who is constantly operating equipment.

Danger is particularly near during rush periods when the farmer is working long hours, gets in a hurry, and is tired. Such a time is now, during the harvest season.

The combination of long hours and hard work leads to both carelessness and slower reflexes. This can be fatal.

There's usually a rash of serious farm accidents both during the spring planting rush and the fall harvest rush.

Keep this in mind during the harvest season. A deliberate effort to be safe, especially when the hours are long and the work is hard, can be among the farmer's most important jobs in the next several weeks.

On Blackbirds, a Modern Pest

A few years ago, Alfred Hitchkok, with his uncanny ability to project the borders of reality, made a hit with a movie called "Birds."

Alfred Hitchkok's blackbirds were extremely numerous, to the point that there seemed to be no end to them. Now, people are increasingly finding that hordes of blackbirds are not just a movie man's dream.

Nearly everone is familiar with the great flocks of blackbirds which fly overhead from time to time. They literally darken the sky and it takes quite a bit of time for the whole flock to pass over.

Hitchkok's birds, unlike the birds we know, became very aggressive, attacking man and becoming a threat to man's very survival. The blackbirds we know are not attacking individual persons, but they are becoming an increasing threat to his agricultural economy.

The Pennsylvania Department of Agriculture recently issued an item quoting Lauree Crom, a Crawford County dairy farmer, on the farmer's problems with redwinged blackbirds. He said the birds ruined two-thirds of his 75-acre corn crop at an estimated loss of $4,000.

Crom, who was urging that something be done to prevent such damage and to compensate farmers for the loss, said carbide cannons which fire intermittently are no help. "Those black babies just love to roost on the cannons," he said.

It doesn't take much imagination to see what large flocks can do when they settle into a farmer's corn or grain field. What these birds lack in size they make up in numbers.

While some species of birds are endangered by man, the blackbirds are one of those species which thrives on the man-made environment. Deer and many species of ducks, so long as they are not overhunted, also thrive and are reported to be more abundant than ever before.

Many of the prospering species seem to have one thing in common — they prosper at the farmer's expense. Actually, much of the wildlife feed provided by farmers is no direct cost to farmers, since much of the feed is in the form of grain and corn left on the field from inefficient harvesting.

Few farmers, we feel sure, will begrudge wild animals and birds a small share of their crops. Squirrels, racoons, deer and many species of birds have traditionally shared in the bounty of the farm.

But the modern farm scene, which has seen declining populations in many rural areas, the development of large acreages harvested by large machinery, and other developments have resulted in a situation where the food available to animals and birds has increased at the same time pressure by people has decreased.

Some species, such as blackbirds, have found these conditions ideal and have multiplied to the point where they are a threat to their human benefactors.

It now appears that the blackbird must soon join an already long list of pests, such as corn rootworm and Japanese beetle and hundreds more, which farmers must control in order to continue to feed the nation.

While the breeding of corn and grain varieties with maximum resistance to bird damage would appear to be a partial and temporary solution, it would appear that blackbirds lack the natural predators which will keep their populations under control. Direct action by man to reduce blackbird populations will almost certainly be needed in the future to keep blackbirds from becoming much more numerous and a far greater menace to our own food supply.

TO RESPECT FLY-FREE DATE

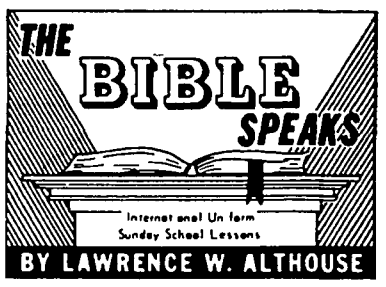
Winter wheat continues to receive considerable acregge in many parts of the country. Growers are reminded that the Hessian Fly is still a problem with most varieties available at this time; for several years it was regarded that Redcoat was fly resistant, but according to the experiences of 1971, we suggest that this variety not be classified as fly resistant. The recognized fly free date for Southeastern Pennsylvania is around October 10, or after the first killing frost. This means that wheat for grain purposes should not be planted before this time.

TO MANAGE HERD CAREFULLY

Dairymen are reminded of the danger of grass-flavored milk when the milking herd is grazed on alfalfa or clover at this time of the year. This lush growth of legumes should be handled similar to the early growth of the spring. Cows should be grazed on the area after the milking period and removed from the forage for at least four hours before the next milking period. Also, freshly chopped forage or corn silage should be fed after the herd is milked rather than prior to the milking period. Milk flavor and quality must be good in order to prevent rejections and loss of milk prices. Garlic infested pastures should not be grazed by the milking herd; we notice that the fall growth of garlic has already developed and dairymen should be aware of this milk quality threat.

TO RODENT-PROOF CORN STORAGE

Corn picking time is approaching and many cribs and storage bins will be filled to capacity. The damage done by rats is enormous on too many of our farms. This is expecially true when normal storage cribs will not hold the crop and piles of corn are placed on the barn floor or other temporary places. When cold weather arrives, rodents will come looking for a home for the winter; these open grain storage places is inviting to them and soon the rat population will increase. Hardware cloth or other metal shields may be used on normal storage cribs and the open storages should be fed out as soon as possible. Good sanitation about the premises will help keep down the rat population along with poison bait stations. Broken concrete floor or walks and loose stone or black walls are good nesting places for rats and should be repaired before cold weather arrives. Rodents carry disease as well as destroy or damage valuable feed grains. We urge all farmers and property owners to wage war on them and make every effort to eliminate all rats and mice.



WRONG NUMBER?

Lesson for October 3, 1971

Background Scripture: Exodus 3:1-20, 2 Timothy 1 8-9
Devotional Reading Mark 2 13-17

Have you ever noticed how often it seems that God makes some poor choices in the people whom he calls for leadership? Frequently he selects precisely the kind of persons that you and I would ignore or reject if the decision were ours. Sometimes we can't understand how God could exercise such poor judgement.

Rev. Althouse

A case in point was the man named Moses He seemed the least likely candidate to become the leader who would successfully lead the people of Israel out of Egypt He had started out well enough, for though he had been born a Hebrew, a "lucky break" caused him to be raised in the palace by the Pharaoh's daughter. Brought up as an Egyptian noble, he had all the benefits of the culture and education of the royal court. These bright prospects, however, were thrown away with a senseless, violent act.

The tragic disappointment

Many years later this tragic failure is confronted by God in a mystical experience and in his awe, asks: "Whom am I . . . . ?' There were a number of answers that might have occurred to us:

—the murderer of an Egyptian slave-master
—a fugitive from Egyptian justice
—a simple Midianite shepherd
—an eighty year-old "has-been"
—a descendent of Abraham who knows little, if anything, of Abraham's God.

Surely this is not the man for the job! Perhaps God has gotten a wrong number!

This same thought occurred to Moses too. He too could not believe that God wasn't giving the message to the wrong man. "Who am I that I should go to Pharaoh, and bring the sons of Israel out of Egypt" (Exodus 3:11). It was a good question, but Moses would find that God could always match a good question with a good answer.

I will be with you

Actually, Moses had asked the wrong question. Instead of asking, "Who am I", the real question was "Who are you?" It is not because of who Moses is, but who God is that the task can be performed. "I will send you" and "I will be with you" he is assured. The success of this mission will not rest upon the power of Moses, but upon the power of God. All that Moses will have to do is to hear the call and respond to it.

But why Moses?

For one thing, Moses had "turned aside to see this great sight." If he had ignored the burning bush, if he had refused to listen to God's voice, he would not have received the call. Furthermore, Moses not only "turned aside," but he accepted the challenge and thus God was vindicated in his choice of this man whom we would likely have regarded as a "wrong number."

UEP Asks Legislation to Allow Producers to Vote on Controls

United Egg Producers' Board of Directors meeting in Los Angeles, Calif, recently unanimously endorsed a policy position to seek enabling legislation which would allow egg producers to vote on production controls.

President Fred Adams said the new policy came as result of a membership survey which indicated an overwhelming majority of U.E.P. members favor the right of producers to vote on the question of controls. The results of the survey were announced on September 2 at a meeting of the U.E.P. Executive Committee.

"The unanimous vote to seek enabling legislation should not be interpreted to mean the U.E.P. Board unanimously supports production or marketing controls," Adams explained. "It does mean we believe in our democratic form of government which allows an individual the right to vote. Egg producers presently do not have this right."

A special committee representing all areas of the country will be appointed to work with the Long Range Planning Committee on drafting a proposal for enabling legislation, Adams said. Each regional cooperative member of U.E.P. has been requested to suggest one member for this committee.

The Board reiterated its previous position of favoring enabling legislation which would allow egg producers to vote on a national check-off plan for promotion, research and advertising. For several months, U.E.P. has been working with industry and the USDA on a legislative proposal for check-off. The Board requested the Long Range Planning Committee to review recommendations of the USDA concerning the proposal.

Adams said any enabling legislation for controls will be in addition to the U.E.P. check-off proposal. He said the organization did not want to combine the two into one piece of legislation because the egg industry considers them as separate subjects.

Considerable time was spent on methods of price determination and marketing activities of the organization, Adams said.

"U.E.P. has provided leadership in methods of price determination since its inception," Adams continued. "New and different problems seem to confront the egg industry with each new development Since these problems directly affect every egg producer, there is always great interest and concern for U.E.P. activities in this area."

The most debated of the organization's activities was its participation in egg futures trading, the President said. After a thorough discussion, the Board approved a three-point proposal concerning egg futures: 1) To actively seek the abolition of trading in egg futures; 2) To participate in futures trading if necessary for the benefit of U.E.P. members until such trading is discontinued, and 3) To establish an advisory committee to work with management on any futures trading which the organization may undertake.

On other matters, the Board reiterated its previous positions on chain store entry into egg production, cash versus accrual accounting, and the need for a retail price to consumers quotation from USDA.

The group also approved a recommendation to seek regulations which would require eggs of foreign origin to be individually labeled as to country of origin.

FFA members attending the Atlantic Rural Exposition recently are: left to right, Melvin Weiler, Stevens RD1; Dave Gerlach, Columbia RD2, second high individual score in livestock judging, and Don Wenger, Manheim RD2. Rodney Unger, of the Solanco FFA Chapter, was absent when photo was taken.

FFA Members Place at Richmond. Va.

Four Lancaster County FFA members had high placings recently at the Atlantic Rural Exposition in Richmond, Va., in conjunction with the Virginia State Fair.

Donald Wenger, Manheim Central FFA Chapter, was one of three members of the Pennsylvania FFA dairy judging team that was awarded first place.Dave Gerlach, Penn Manor FFA Chapter, had the second highest individual score in livestock judging. His state team finished fifth.

Melvin Weiler, Cloister FFA Chapter at Ephrata, and Rodney Unger, Solanco FFA Chapter, were members of the three-man FFA state poultry judging team which placed third.

Shoes Help Prevent Injuries

Despite protests, children should be made to wear shoes when they go outside to play. Sturdy shoes protect busy feet from broken glass, rocks or rusty nails. Thick, rubber-soled shoes provide good grip for climbing and running.

Fruit Research Center at Biglerville Is Dedicated

More than 500 persons, including state and federal officials, joined with top representatives of Pennsylvania's fruit industry September 15 to dedicate the $900,000 Musselman Building for Research and Education at the Fruit Research Laboratory of Pennsylvania State University at Biglerville

Construction was made possible by a $350,000 grant from the Musselman Foundation, established in 1942 by the late C. H. and Emma G Musselman, founders of the company which is now the Musselman Fruit Products Division of Pet, Inc

"This structure and the research and educational programs which will be carried on within its walls will be a constant reminder of what can be accomplished when the public, private and industrial segments of our society join forces to reach a common goal," said Dr. R. E. Larson, Dean of Penn State's College of Agriculture, as he formally accepted the new facilities.

The Musselman Foundation grant was matched by an appropriation of $377,237 from the Pennsylvania legislature and administered by the General State Authority An additional grant of $68,510 was provided by federal sources under the Federal Facilities Act. Along with other grants and gifts, the total investment in the Research Center is close to $900,000

Dr. W. I. Thomas, associate dean and associate director of the University's Agricultural Experiment Station, was master of ceremonies for the dedication.

Among those making formal comments were Dr. Fred H. Lewis, scientist-in-charge, Fruit Research Laboratory, Biglerville, and Earl W. Strite, president, State Horticultural Association of Pennsylvania.

Dr Lewis expressed appreciation on behalf of his staff for the support given the Research Center by the Musselman Foundation, the Fruit Growers Association, and the industry. Mr. Strite also thanked the Foundation and others who contributed to the new fruit research facilities.

Speaking on behalf of the Pennsylvania fruit growers, Mr. Strite stated: "I am sure that this laboratory and education building will serve the fruit growers for many years and help us overcome our growing problems."

Mr. Charles Blum, deputy executive director of the General State Authority, presented a symbolic key to the building, which was accepted by Dean Larson on behalf of the University and the College of Agriculture.

Both Dean Larson and J. A. Hauser, president of the Musselman Foundation, unveiled plaques naming the new structure the "Musselman Building for Agricultural Research and Education" and acknowledging the Musselman Foundation grant.

Hauser paid tribute to the "unusual foresight and vision" of the late Mr. Musselman and commented that the grant would "perpetuate" the leadership in the fruit industry displayed by the Musselman family over much of the first half of this century.

Dean Larson accepted the building "with deep appreciation to many people--the University administrators, agricultural leaders, legislators, General State Authority personnel, and especially the Musselman Foundation for their generous support."

Lancaster Co. 4-H, FFA Youth Get Top Awards at Harrisburg Show

Lancaster County 4-H and FFA youth fared well at the 16th annual Pennsylvania Junior Dairy Show Monday, September 20, in conjunction with the Pennsylvania All-American Dairy Show in Harrisburg.

In the 4-H Brown Swiss show, Linda Sue Witmer, Willow Street RD2, received senior and grand champion honors with her first place three and four year old, Needmor Delila. She also received a master showman award.

In the FFA Jersey show, Thomas W. Aaron, Quarryville RD1, won senior and grand champion with his first place three and four year old, Lynmoores Fashion Gail. He was reserve champion showman and fitter.

He also showed fourth place senior yearling in the FFA contest. Robert Witmer, Willow Street RD2, showed fifth place senior calf.

In the FFA division, Fred W. Edwards, Peach Bottom RD, showed first place intermediate calf, Don's Dell Wind Queen.

Donald S. Wenger, Manheim RD2, showed first place senior calf, Shady Creek Misty Mo.

In the 4-H Ayrshire show, reserve senior and reserve grand champion honors went to Stephen Horton, Elizabethtown, with his first place two year old, Masonic Homes Flashy Marlin.

First place intermediate calf in the Ayrshire show went to Curtis Hamilton, Elizabethtown, with Masonic Homes Cal-Rule. He received a master fitter award.

Paul Walmer, Elizabethtown, showed second place intermediate calf and won a master fitter award.

Second place junior yearling was shown by Robin Westcott, Elizabethtown, who also won a master fitter award.

Roger Shobe, Elizabethtown, won fourth place senior yearling and a master showman award.

In the FFA Guernsey show, Jesse L. Balmer, Lititz RD4, won reserve senior champion with his second place cow in the three and four year old class, Gordline Princess C Candy. He also had reserve junior champion with his first place intermediate calf, Cordlines Princes Happy.

Also in the FFA Guernsey show were John G. Miller, Elm, fourth place junior calf; Kenneth E. Grube, Lititz, second place senior calf and first place two year old, Corline M Chiefs Tutti; and David W. Bitler, Peach Bottom RD2, third place two year old. Miller received a master fitter award; Grube, master fitter and showman; and Bitler, master showman.

In the 4-H Guernsey show, Susan Louise Witmer, Willow Street RD1, was second in the three and four year old class, and Peter C. Witmer, Willow Street RD1, showed second place five year old. Peter also received a master fitter and showman award. Marlin M. Stoltzfus, Ronks RD1, was third in the two year old class.

Ellen L. Schmuck, Peach Bottom RD2, won first place in the 4-H Jersey senior yearling heifer class, with Acadas Dasher Esther. Ellen also won a master fitter award.

Others in the 4-H Jersey show were Larry W Aaron, Quarryville RD1, with second place intermediate calf, and Barbara J Aaron, Quarryville RD1, with second place two year old cow. Both won master fitter and master showman awards.

In the 4-H Holstein show, Lynn H. Royer, 2025 Oregon Pike, Lancaster, showed first place two year old, Blossomelle Lovee Dove. He also was reserve grand champion showman and fitter.

Also in the two year old class, Linda Kauffman, Elizabethtown RD1, placed second and received a master showman award. Raelene Harbold, Elizabethtown RD1, placed seventh and Rhoda Stauffer, Ephrata RD1, placed 19th.

In the intermediate calf class Susan Ann Frey, 401 Beaver Valley Pike, Lancaster, placed third and Gary Akers, Quarryville RD1, placed eighth. Akers was a master fitter.

Randy Hess, Strasburg RD1, had first place senior calf, Hess Vale Topper Suzann, and was master showman.

Johnny Frey, 401 Beaver Valley Pike, Lancaster, showed second place junior yearling. Ninth place junior yearling was shown by Donna M. Akers, Quarryville RD1. She received a master showman award.

Bruce Landis, Lancaster RD6, showed 12th place senior yearling.

In the FFA Holstein show, Paul E. Horning, Stevens, placed second in junior calf class and won a master fitter award. In the same class, Richard Bollinger, Lititz, placed sixth.

J. Kenneth Groff, Leola, was 11th in the intermediate calf class and Thomas R. Stottlemyer, Paradise was 13th. Russel Kline, Reinholds, was 12th, and also showed fourth place junior yearling.

Marlin Smoker, Stevens, had third place senior calf and won master fitter and master showman.

Seventh in that class was Wayne Kreider, Quarryville RD1.

Earl C. Stauffer, Ephrata RD1, was fifth in the senior yearling class, and won a master fitter award.

Landis Cow Wins at Lampeter Fair

The grand champion at the Lampeter Fair was an aged Holstein cow owned by Greg Landis and shown by his father, Jay Landis. The Landis cow had previously won the senior female championship.

An intermediate calf shown by Susan Frey took junior champion honors of the show.

Reserve grand champion of the show was a three year old owned and shown by Elvin Hess Jr.

Holstein dairy herd honors went to Ira Welk while Elvin Hess Jr captured the prize for the best three females.

Marvin Miller won championships with his Ayrshires and Brown Swiss and Arthur Brenneman showed the top Guernsey

Other top honors at the show went to the following:

Junior calf - Bruce Landis, first; Carl Troop, second; Marvin Miller, third.

Intermediate calf - Susan Frey, first; Jimmy Frey, second; Leroy Welk, third.

Senior calf - Barry Kreider, first; Randy Hess, second; Robb Hess, third.

Junior Yearling - John Kreider, first; Martin Harnish, second; Carl Troop, third.

Senior yearling - Sandra Frey, first; Richard Hess, second; Bruce Landis, third.

Junior get of sire, John Kreider.

Two year olds - Carl Troop, first; Elvin Hess, second; Carol Troop, third.

Three year olds - Elvin Hess Jr, first; Susan Frey, second; Curt Hess' third.

Four year olds - Ira Welk, first; John Kreider, second; Donna Hess, third.

Aged cow, Greg Landis.

Best dairy herd, Ira Welk.

Produce of dam, Richard Hess.

Dam and daughter, Elvin Hess.

Junior showman, Bruce Landis; senior showman, Robb Hess.

Wildcatter

Pioneers of the American oil industry coined the nickname of "wildcatter" for an oil driller Wild cats, in remote areas of Pennsylvania, fought at night over food scraps left by drilling crews

Are your beef cattle programmed for profits?

There is a program that will give your cattle the exact balance between feed and forage for maximum growth and profit. Whether yours is a cow-calf operation, or you're finishing cattle for market, Red Rose's unique new service can take the guesswork out of your feeding operation.

You tell us about your herd. The breed. Average weight. The gain per head you want to achieve. What forage you're feeding and how much. Give us these facts and we'll analyze your herd and tell you how you can obtain the most efficient, profitable operation possible.

Your present feeding program may be the best possible one for your herd. But, if you're not absolutely sure, let us compute it the Red Rose way. This scientifically formulated analysis is free.

Page Appointments

Congressional pages are appointed on a patronage basis by members of Congress and by the marshal of the Supreme Court with consent of the chief justice. There are 26 pages in the Senate, 50 in the House and four in the Supreme Court—80 in all. Girl pages were appointed for the first time in 1971.

Adams County to Get Food Stamps

The U.S. Department of Agriculture recently designated Adams County, Pa., to have a Food Stamp Program.

Designation of Adams County was requested by the Commonwealth of Pennsylvania. Financial support will be provided by the Emergency Health and Medical Services of the Office of Economic Opportunity.

Adams is the last of Pennsylvania's 67 counties to be designated.

USDA's Food and Nutrition Service reported that 3,102 counties and independent cities across the country have a food assistance program-either the food stamp program or the food distribution program-and two counties (including Adams) are in the "planning stage."

From a low point of nine no-program counties, the number has now increased to 25, due to withdrawals in some States. These include 12 counties that were formerly distributing donated foods-nine in Missouri and two in Texas and one in Colorado-and four nonoperating counties in Idaho and one in Montana that relinquished their food stamp designations.

The food stamp program enables eligible low-income families to increase their food-purchasing power by investing their own food money in federal food coupons worth more than they paid for them. The coupons are spent like cash at retail food outlets authorized for the program.

Princep™ turns weedy alfalfa into alfalfa again.

Spraying Princep™ 80W on dormant alfalfa this fall, can give you better quality, high-yielding alfalfa next year.

It can lengthen the life of your alfalfa stand, and make your hay worth more. If you've got a weedy alfalfa stand at least a year old, spray Princep and you'll cut cleaner hay next year.

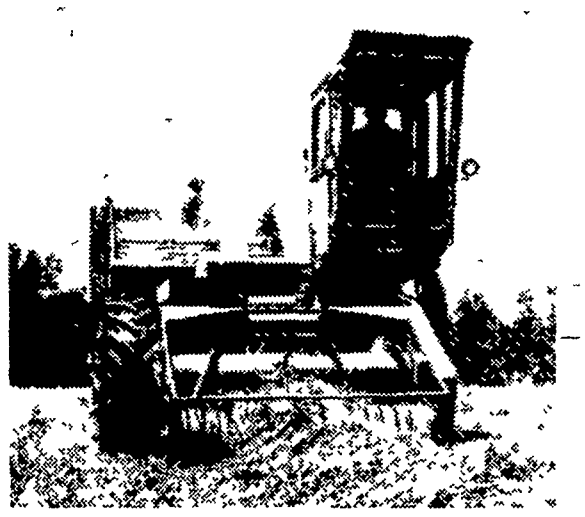
High capacity, plug-free chopping with

Uni-Forage Harvester.



Name your chopping job and Uni will do it. With big 6′ wide windrow pickup, a direct cut attachment, 2 or 3-row crop head, or Uni stripper plate cornhead for making ear corn feed.

You'll be amazed at the plug-free cutting ability of this high capacity machine. Three upper feed rolls and six spiral knives chop hour after hour with a more uniform cut . . . down to 3/16″.

There's a choice of six cutter head screens to make even more uniform feed and better packing in the silo.

And that's only part of the story. You can switch to Uni-Combine, Picker, Sheller, Tool Carrier or Rotary Snow Plow in an hour's time . . . thanks to the unique interchangeable Power Unit.

Uni-Forage Harvester . . . another reason why owners say . . .

Dr. Burns Will Speak At Seminar for Women

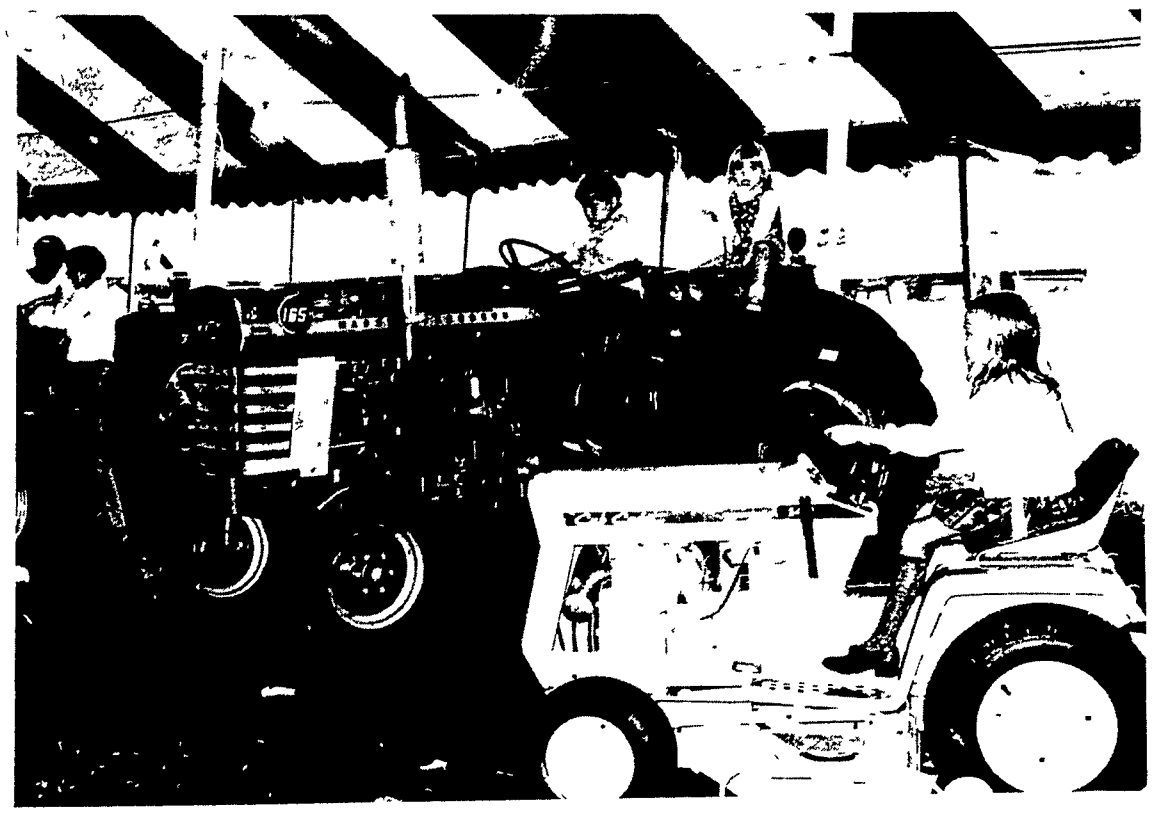
During the Seminar for Women conducted by the Cooperative Extension Service of Pennsylvania State University October 19 and 20 at the Holiday Inn, King of Prussia, there will be a workshop on Continuing Education for Women, according to Miss June Wilke, Chester County Extension home economist. The workshop will be conducted by Dr. Martha Burns.

Dr. Burns is Coordinator of Educational Counseling Services for adult students in Continuing Education. In this position she is to give special attention to the ways in which continuing education programs may be more effective in helping adult women. Dr. Burns is a member of the staff of Pennsylvania State University.

The program for the workshop will be concerned with opportunities in continuing education for women on or off the college campus.

The workshop is for those women who want to brush up on old skills or develop new skills to get into the labor force or for those who want to be more knowledgeable of problems in relation to family, community, state or nation in order to be more effective citizens and members of a changing society.

Exhibits illustrating various ways to continue one's education will also be on display.



Tractors of all sizes are a big hit at the Lancaster County fairs. As this candid photo at the Lampeter Fair last week shows, tractors are especially a hit with the children. And most of all, they're a hit with girls. Which may be somewhat of a disappointment for the dealers who would like to sell a tractor to Dad. But it does show the business has a future.

No Other Protein Need When You Feed

Cindy Hess Named Lampeter Fair Queen

Cindy Hess, 16, daughter of Mr. and Mrs. Richard H. Hess, Strasburg RD1, was named queen last week at the Lampeter Fair. She is a Lampeter-Strasburg High School student.

First runner-up was Nancy Nolt, 327 Homecrest Drive, Willow Street, daughter of Mr and Mrs. I. H. Nolt.

Lynn Jarrett, 407 Golf Road, daughter of Mrs. Marjorie M. Jarrett, was second runner-up.

Judges for the contest were Mrs. Donna Wert, Mrs. Susan Herriott and Dr. John Black.

Talent winners in the junior high division Thursday evening were:

First-An instrumental group made up of Carla Peck, Lisa Moyer, Marty Huber and Steve Mersky.

Second-Pamela Scheid, piano solo.

Third-Julie Fry, piano solo.

Fourth-Nancy Brooks, baton twirling.

In the senior high division, winners were:

First-Robert Grabowski, vocal solo.

Second-Robert Wiker, trumpet solo.

Third-Frank Rapp and James McClure, vocal-guitar duet.

Lampeter Fair Hog Sells for $1.70

The Lampeter Fair grand champion hog, a 230 pound. Yorkshire cross owned by Lloyd Hess, was bought for $1.70 a pound or a total of $391 by Kunzler and Co., Lancaster.

The champion pen of two, owned by Ed Kilheffer, brought 60 cents a pound from Garden Spot Meats, Lancaster.

Garden Spot also purchased the champion pen of four hogs for 25 cents a pound.

A total of 22 hogs were auctioned with other buyers including the Strasburg National Bank and Robert Welk.

The lowest price paid was 23 cents a pound, with hogs not carrying a championship ribbon bringing between 23 and 26 cents a pound.

Howard Shaub was the auctioneer.

Living Cells

The unit of living matter called a cell was discovered by Robert Hooke, who saw the walls of plant cells. He called each unit a "cell" because many of them looked like tiny prison cells.

10 4-H'ers Win at District Horse Show

Ten Lancaster County 4-H members are eligible for the state 4-H Horse Show in Harrisburg November 12 and 13 as the result of high placings recently in the district show.

Making top placings at the district show at Ludwigs Corner, Chester County, were:

Wylie Baker, 70 Brandt Blvd., Landisville, saddleseat equition and English pleasure horse; Cheryl Gernert, Manheim RD4, groom and show senior; Jim Glick, 231 E. Main St., Bareville, groom and show junior.

Randy Glick, 231 E. Main St., Bareville, pole bending; David Good, Elizabethtown RD1, western pleasure ponies, 12.2 hands and under; Tom Hamill, Mount Joy RD1, saddle seat equition junior and English pleasure;.

Debra Heidig, 2137 Old Philadelphia Pike, Lancaster, western pleasure horses over 14.0 hands; Nancy Henkel, Strasburg RD1, working hunter horses; Karen Ressler, Elizabethtown RD1, stock seat equition senior; James Watts, 21 N. Grant St., Manheim, western riding horse.

4-H Dairy Team Is Third

The Pennsylvania 4-H dairy judging team, which has all four members from Lancaster County, finished third at the Atlantic Rural Exposition in Richmond, Va., recently.

Raelene Harbold, Elizabetntown RD1, had the overall high individual score. She was second in the Brown Swiss and Ayrshire breeds.

Burnell Buchen, Manheim RD3, placed first in Jerseys and second in Guernseys; Sue Kauffman, Elizabethtown RD1, was first in Brown Swiss, and Robert Hess, Strasburg RD1, was third in Jerseys.

4-H CLUB Week

October 3-9

For good production next lactation,

FEED PURINA
DAIRY CONDITIONER

As a dairyman, you know that good milk production doesn't just happen It's something you plan for by establishing a herd with the genetic potential for good production, then managing and feeding your cows so they'll produce up to their bred-in ability.

Many successful local dairymen also plan for good production with a proven program of dry cow feeding. They need Purina Dairy Conditioner, a research-proven ration to help give dry cows body condition they need for good production after they freshen.

Purina Dairy Conditioner is an extra-palatable 12½ percent protein ration It's fortified with vitamins A and D plus extra phosphorus to help guard against milk fever.

Purina Dairy Conditioner is low-cost, too, because the amounts you feed depend on your cows' condition and on the quality of the roughages you feed For example, a cow dried off in good condition being fed high-quality roughages would require less Dairy Conditioner than a cow in only fair condition being fed fair quality roughages.

Drop in soon and get your free copy of the Purina Dry Cow Program folder. We'll be glad to show you how Purina Dairy Conditioner can help you prepare your dry cows for good production next lactation.

LIMING PAYS

and BAKER'S

AG-LIME pays off BEST!

Liming pays off in healthier soil, better crops, stronger and more productive animals. In fact, it has been estimated that each $1 invested in limestone returns from $3 to $10 in bigger and better yields.

Baker's agricultural limestone pays off best because it does more. Baker's ag-lime sweetens soil to reduce acidity and raise pH level. It also adds vital magnesium. Both are important to make sure that your crops can make full use of the fertilizers you apply.

FALL LIMING IS BEST! All winter long—through rain, snow, freezing and thawing—the limestone seeps down to root depths to put soil into top condition for spring. Choose the brand that meets your needs best. Contact your nearest dealer.

	Magnesium Oxide	Calcium Oxide
● "Conestoga Valley" balanced limestone from our Ephrata quarry	14%	36%
● "Prime Lime" dolomite limestone from our Gap quarry.....	20%	30%
● "Hy-Mag" limestone from our Paradise quarry	20%	30%

Inscription on Cross

The initials INRI seen at the top of the cross in pictures of the crucifixion of Jesus Christ is taken from the Latin words which Pontius Pilate ordered inscribed on the cross: "Iesus Nazarenus Rex Iudaeorum" (Jesus of Nazareth, king of the Jews) as recorded in the Pook of John in the New Testament of the Bible.

Phoenixville 4-H'er Named for Forestry Scholarship

David Weinstock, 17, 1234 Pothouse Road, Phoenixville, Chester County, who has compiled an outstanding record in 4-H work, recently was named state nominee for a forestry scholarship in the 1971 4-H National Awards program.

David's records will be entered in national competition with awards being presented at National 4-H Congress in Chicago in December.

Carroll L. Howes, assistant State 4-H leader at Pennsylvania State University, who announced the selection, said David was judged on the basis of project work, leadership ability, and participation in county and state 4-H activities.

The son of Dr. and Mrs. Joseph Weinstock, he is a freshman at Penn State. He has been a 4-H member five years.

A member of three Chester County 4-H Clubs, David served as president, vice president, secretary, treasurer, and was a County 4-H Council representative. He also assisted with club activities and events as a teen leader the past two years.

The state scholarship nominee completed projects in dairy, goat, dairy, wildlife conservation, photography, soil and water conservation, teen leadership and veterinary science.

Active in county 4-H events, David participated in the roundup, picnic, officers training, and lecture series.

He also took part in the District 4-H Dairy Show, Regional 4-H Demonstration Contest, District 4-H Teen Leaders Retreat, Pennsylvania Junior Dairy Show, Pennsylvania 4-H Congress, and Citizenship Short Course in Washington, D. C.

David won numerous fitting and showmanship awards in local and district dairy contests.

Commenting on the values of the youth program, David said· "4-H has taught me how to better understand people and it has also given me a set of values."

He is one of 40 Commonwealth 4-H members being selected for scholarship awards in the various project categories.

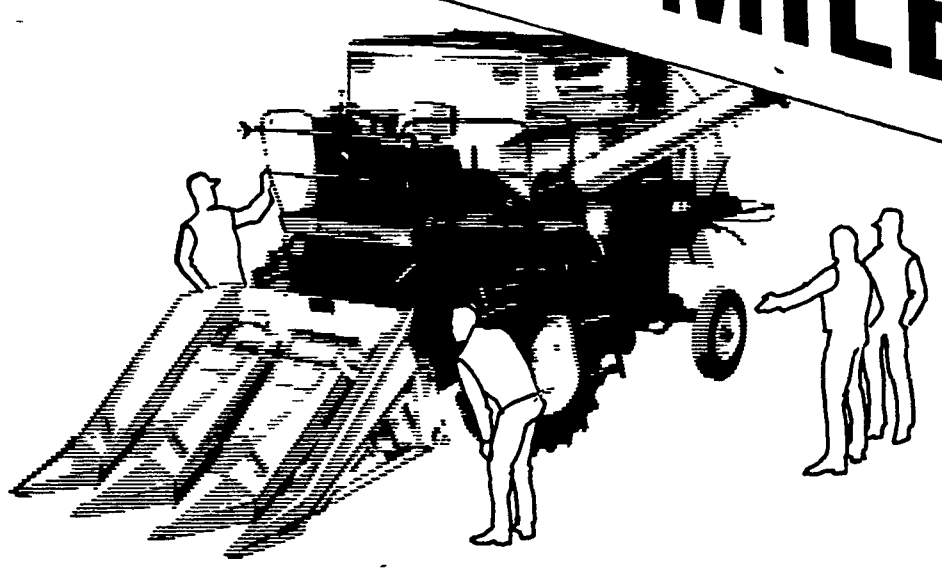
GLEANER MODEL K COMBINE BETTER BY A COUNTRY MILE



WHY look for miles around? The Model K carries the traditional *Gleaner* combine reputation for high performance, dependability and long life . . . plus, more power and capacity than ever before. It's bigger wherever it touches the crop . . . from the header right through to the grain tank.

It's got a 78 h.p. engine and a 27-inch cylinder that threshes across its whole-width, plus separation and cleaning capacity to handle the biggest yields. Corn heads are available for 20, 30, and 40-inch rows, and there are 10, 12, and 13-foot grain headers. So Go *Gleaner* combine with the new Model K . . . you'll agree that *Gleaner* combin.. have been growing with you.

NDC Elects BoardMembers

Seventeen prominent dairy farmers and one dairy processor were elected to the 1972 Board of Directors of the National Dairy Council recently.

The election was held as part of the organization's annual fall Board meeting to expand the Board membership from 50 to 60 as voted by the NDC Board at its meeting last May.

The NDC meetings were held concurrently with Board meetings of the American Dairy Association, Dairy Research Incorporated (DRINC), and the United Dairy Industry Association

The eighteen new NDC Board members are:

Joe B. Baker, Sanford, Fla., Robert N. Ball, Warwick, N Y , Gerald Bendzick, Jordan, Minn , Joe E. Cain, Carter, Okla., Leonard Cheatham, Laveen, Ariz.; Eugene Erskine, Hemlock, Mich.; Jay W. Hauger, Berlin, Pa.; William Higginbotham, Washington, Ga.;

Dan Holtz, Hawick, Minn.; Arleigh G. Larson, Vice President, National Dairy Division, Great A&P Tea Company, Inc., Manitowoc, Wis.; Bernard Monson, Gowrie, Ia.; Ray Powers, Mountain Empire Dairymen's Assn., Colorado Springs, Col.; Ralph Prime, Augusta, Me.; Jerry Sipple, Menomonie, Wis.

Everette Smith, McGaheysville, Va., Harold L. Smith, Akron, Ind ; Paul Stebbins, Farmersville, Ohio; Sherman Varney, Truner Center, Me.

The Old Timer

Phila. EPA Administrator Named

The appointment of Edward W. Furia Jr, as the Environmental Protection Agency Regional Administrator for Region III, with headquarters in Philadelphia, was announced recently by William D. Ruckelshaus, EPA Administrator.

Furia, 29, Philadelphia, is a lawyer and city planner specializing in environmental problems. He also has a background in communications and marketing

Ruckelshaus predicted that Furia will provide "the type of vigorous and far-seeing leadership we need to insure that EPA's programs are carried out successfully"

Furia has headed a consultant firm in Philadelphia, Edward Furia Associates, specializing in the environment

In addition to serving as a consultant to various industries, Furia has been a Consultant to the Earth Week Congress, a consortium of universities, scientific institutes, environmental groups and businessmen; and the University City Science Center, a non-profit institution in Philadelphia representing 24 universities.

Furia also served as director of the first Earth Week in Philadelphia from December 1969 to May 1970. The Earth Week Technical Symposia held in connection with this event provided the data and opinions for a book entitled "The Delaware Valley Environment: Status and Prospect."

Furia has served as a delegate to numerous international and national conferences on the environment.

He did copywriting, market and communications research for Smith, Kline, and French Laboratories from 1963 to 1965 and was president of a market research and advertising agency in Aspen, Colorado, from 1965 to 1967.

He was graduated cum laude from the University of Pennsylvania 1963, where he served as President of his class. Furia obtained a law degree from the University of Pennsylvania Law School in May 1969, and a Master of City and Regional Planning degree from the University of Pennsylvania in December 1969.

Furia and his wife, Joan, live in Center City Philadelphia.

As administrator of Region III, Furia will be responsible for all EPA programs in Delaware, Maryland, Pennsylvania, Virginia, West Virginia, and the District of Columbia.

The new appointment brings to nine the number of EPA Regional Administrators announced so far. The other Regional Administrators previously announced are Francis T. Mayo, Region 5, with headquarters in Chicago; John McGlennon, Region 1, Boston; Jerome H. Svore, Region 7, Kansas City, Missouri; Gerald M. Hansler, Region 2, New York City; John A. Green, Region 8, Denver; Jack E. Ravan, Region 4, Atlanta; Paul DeFalco Jr, Region 9, San Francisco; and James L. Agee, Region 10 Seattle.

Announced today a SPECIAL PREVIEW showing of the 1972 ALOUETTE BEAUTIFUL BRUTE snowmobile line. Five completely restyled and reengineered models.

The ALOUETTE VENTURE 440 shown above features an 18" polyester cord track powered by a 436 cc, 30 hp Kohler engine.

The new ALOUETTE offer improved handling with Flexease · ball joint steering, better performance with three point track support, sports-car-style disc brakes, contured throttle for more precise speed control, emergency engine kill switch, airflow windshield, dual tail lights, unitized steel chassis, and a high density foam cushioned seat. Electric start is optional.

Visitors to Lititz Sports Center and Shenk's Farm Service can also enter the ALOUETTE snowmobile contest. First prize is an airplane.

Open House Set

A nationally known Midwest dairy cattle judge, writer and purebred breeder will be the principal speaker at the annual Maryland-West Virginia Bull Stud open house October 21 north of Frederick.

He is John W. McKitrick of Columbus, Ohio, partner and vice president of Welcome In Farms, Inc. Last year McKitrick judged 54 dairy breed shows throughout the U. S. His topic at the Frederick area bull stud open house will be "Breeding for Production and Longevity."

The open house program will begin at 10 a.m. with a business meeting of the Maryland Artificial Breeding Cooperative and awards for bull stud personnel.

Chicken dinner will be served at noon. A parade of bulls after lunch and review of their records will conclude the day's program. The bull stud facilities will be open for public inspection both morning and afternoon.

Cooperators Announced

The Lancaster County Soil and Water Conservation Service has announced two new cooperators. They are:

Arthur Auker, Rapho Township, 65 acres, and Landis Community Homes, Manheim Township, 122 acres.

Lancaster County FFA members who competed in contests with FFA members and teams from several states at the Eastern States Exposition in Springfield, Mass., recently are: left to right, front row, Tony Haldeman, Jim Charles, and Amos Sauder; back row, Paul Horning, Roy Fasnacht, and Russell Kline.

Local FFA Members Place High at Springfield

Several Lancaster County FFA members placed high in competition recently at the Eastern States Exposition, Springfield, Mass.

Russell Kline, Reinholds, representing the Cloister FFA Chapter of Ephrata, was fifth high individual scorer in the dairy cattle judging contest. He was also one of three members of the first place Pennsylvania team. There were 11 state teams competing.

Among six teams in the small gas engines contest, the Lancaster County team representing Pennsylvania was third. Team members were Tony Haldeman and Amos Sauder, of the Manheim Central FFA Chapter.

In the dairy products judging contest, Paul Horning, Stevens RD1, of Cloister FFA Chapter, placed fifth. Horning was also one of three members of the Pennsylvania team which placed third out of 10 state teams.

In the poultry products judging contest, two Lancaster County FFA members were among the top 10 in individual placings.

Jim Charles of Penn Manor FFA Chapter was sixth and Roy Fasnacht of Cloister FFA Chapter was ninth The Pennsylvania poultry team was sixth out of 10 state team entries.

USDA Extends '69-71 Corn Crop Reseal Loan Dates

In view of the current supply and demand situation and anticipated production of the 1971 corn crop the U. S. Department of Agriculture recently announced that loans on 1969 and 1970 crop corn under extended (reseal) loan, and 1971-crop corn put under farm-stored loan will be extended beyond their announced July 31, 1972, maturity date.

The extended loans on 1969 and 1970-crop corn stored on farms were to mature July 31, 1972. Farmers will be given the option to extend these loans until May 31, 1973.

For the 1971 crop, the regular warehouse-and farm-stored loans will also mature on July 31, 1972. However, producers will be given the option to extend their 1971-crop farm-stored loans until May 31, 1973.

The quantity of reseal farm-stored loans outstanding for the 1969 crop is about 75 million bushels; for the 1970 crop, the quantity is about 125 million bushels.

In addition, USDA officials anticipate that about 300 million to 400 million bushels from the 1971 crop will be put under farm-stored loan and extended until the May 31, 1973 maturity date.

The USDA explained that announcement of the loan plans has been made because it may be a factor with some producers in deciding whether to store or sell during current harvest-time.

Additional details on the extended loan program and other crops that will be covered will be issued then the 1972 Feed Grain program is announced.

Longest Verse

Longest verse in the Bible is the ninth verse of the eighth chapter of the Book of Esther, which extends to a 90-word description of the Persian empire.

Many Agencies Cooperate on Rural Tour

The 1971 Rural Development Tour reflects the efforts and activities of people representing a wide range of federal and state agencies, says Dr. Donald A. Harter, Penn State University extension resource development agent and chairman of the tour.

The two-day tour beginning October 6 will feature some of the latest developments in agriculturally-related industries, as well as planned multi-use recreation and conservation projects. Tour stops will be made in Berks, Chester and Lancaster counties.

The annual tour is designed for public officials, and leaders of organizations and agencies, as well as private individuals concerned with community and rural development.

Serving on the Rural Development Tour Committee with Harter are: Robert A. Powers, Chester County agricultural agent, West Chester; James F. Haldeman, Berks County agricultural agent, Reading; Max Smith, Lancaster County agricultural agent, Lancaster; Miss June Wilke, Chester County home economics extension agent, West Chester; George Coller, District Conservationist, Soil Conservation Service, West Chester.

Orval Bass, district conservationist, Soil Conservation Service, Lancaster; Charles R. Kirk, district conservationist, Soil Conservation Service, Leesport; Ronald Langford, Department of Environmental Resources, Port Kennedy; Robert Schweitzer, Department of Environmental Resources, Port Kennedy; John Kimble, Pennsylvania Department of Agriculture, Lansdale; Charles D. Hogan, district director, ASCS, Palmerton; Henry E. Bohn Jr, ASCS, Wyomissing.

Miss Dorothy Neel, ASCS, Lancaster; Frazee Howe, ASCS, Coatesville; Hugh M. Hindman, State Soil and Water Conservation Commission representative, Middletown; Edison Osborne, Pennsylvania Department of Agriculture, Peach Bottom; Cox W. Shepherd, Pennsylvania Department of Agriculture, Lincoln University.

Roy Giesmann, Farmers Home Administration, Lancaster; John Nehoda, Soil Conservation Service, Lebanon; and Horace C. Rogers Jr, Farmers Home Administration, Harrisburg. Nehoda is secretary for the tour committee.

The featured speaker at the banquet will be Theodore H. Sidor, Office of The Secretary, U. S. Department of Agriculture, Washington, D. C. The banquet will begin at 7 p.m. October 6, at tour headquarters.

Interested persons who would like further information about the tour may contact Mr. Orval Bass, Soil Conservation Service, Farm and Home Center, Room 4, 1383 Arcadia Road, Lancaster, Pa. 17601; Telephone (717) 394-0681. Bass is treasurer for the tour committee.

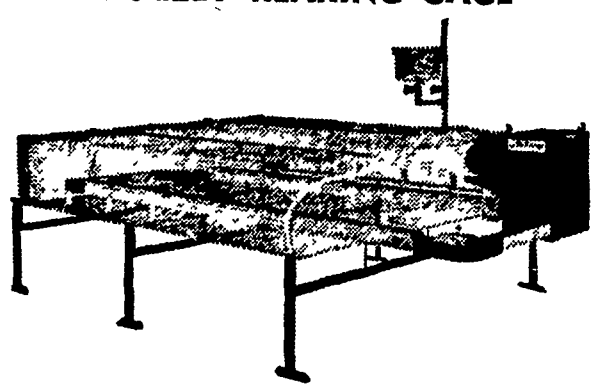
"CHIK-EZE"

Hinged bottom model Chik-Eze includes egg tray which can be put into use at 10 weeks.

This feature will actually permit birds to be kept in the start/grow cage at full laying age if necessary. It also eliminates problems of egg gathering and egg breakage if circumstances delay movement of pullets to grow/lay or permanent lay cages, and it takes care of eggs from birds that lay prematurely. The lowered floor provides a 2 inch gap for eggs to roll out onto tray.

THE ALL NEW FLAT DECK CHIK-EZE PULLET REARING CAGE



. . . offers durability, economy, performance and practical labor saving features that increase management efficiency. The heart of the system is the Big Dutchman chain and trough feeder providing 96 inches of feeding space per cage. There is full availability of all the feed to all the birds. All feed is automatically recirculated and remixed, resulting in better feed consumption.

Extra feed capacity makes high density of birds per cage row practical and manageable.

Representative Speaks at 4-H Leadership Retreat

Discussing the 4-H Teen Leader Handbook with Representative Richard Schulze following his talk at the Chester County 4-H Teen Retreat are left, W. Hosea Latshaw, Spring City, president of Chester County 4-H Council and Dale Nafziger, right, Phoenixville.

Richard Schulze, Representative for the 157th District, suggested the State House of Representatives be reduced to 160 members and the Senate to 40 at the Chester County Teen Retreat.

He further recommended these positions become full time jobs with adequate staff in order to make state government sound, responsible and sensitive to the people.

"The Image of Leadership" was the theme of the Retreat held at the Brandywine YMCA Camp, September 24-26. 53 4-H Teens from Chester and Delaware Counties participated in this leadership training conference.

W. Hosea Latshaw, President of Chester County 4-H Council, welcomed the group to the Retreat.

Boyd Gartly, Inter-state Milk Producers Cooperative then set the stage for the conference during his discussion concerning the qualities of a good leader. He challenged the group to become involved and be a "man with a mission." Carol Rothermel, assistant Chester County Extension home economist, with the aide of several 4-H'ers, discussed "Etiquette for Leaders" while John Schwartz, assistant Chester County agricultural agent, outlined helpful leadership hints to the group

Charles Wollaston, 4-H Club Leader from Toughkenamon, lead the members in mixers and square dancing. Pam Taws, Paoli, and Beth Hutchison, West Grove, served as recreation and song leaders respectively for the group.

Joining them in leadership roles for the week end were Verne Shaw, Lionville; Lisa Kaulback, Paoli; Dale Nafziger, Phoenixville, and Becky Robinson, West Grove, who served as sessions chairman with all the members attending serving on various committees including Candlelight ceremony, flag raising, recreation and Inspirational Service

Penn State to Help Upgrade Argentina's Agriculture

Agricultural education in Argentina entered a new phase recently with the development of an agreement between three U. S. universities, including Pennsylvania State University, and the Graduate School for Agricultural Science at Castelar, Argentina.

The contract is designed to provide assistance to the academic growth of the Argentine institution through technical consultation, purchases of equipment, visual aids and library materials, and advanced degree training of Argentine faculty and students in U. S. Institutions. Financing is provided by the U. S. Agency for International Development (AID).

Penn State's specific academic responsibilities in the project are centered on revising and upgrading of the agricultural extension curriculum, and in initiating and developing programs in crop science. Present plans call for the assignment of the first Penn State faculty member to the Argentina project by January 1972, according to Dr. Robert E. Swope, Coordinator of International Programs for the College of Agriculture.

Short term consultants in specialized sub-disciplines of extension and agronomy will assist in the programs at periodic intervals.

Texas A and M University and Michigan State University are cooperating with Penn State in a consortium arrangement. Consultants will undertake similar, and parallel, activities at Castelar in areas of agricultural economics, animal science, and soil science.

The major goal of the graduate school at Castelar, which opened in 1968, is to serve qualified students from several South American countries-particularly Brazil, Chile, Paraguay, Uruguay, and Argentina. The school is located at the National Center of Agricultural Research operated by INTA, the National Institute of Technical Agriculture, an agency of the Argentina Department of Agriculture.

The new contract represents a renewal of Penn State's earlier interest and involvement in Argentina agriculture.

Last year, College of Agriculture faculty members completed a five year program which provided assistance to fruit production research in the concentrated fruit area of the Rio Negro Valley

Mrs. Hershey Helps Her Husband Prepare for the Manheim Fair

The Manheim Community Farm Show will be held October 6, 7 and 8. It has a new president this year.

He is Donald L. Hershey of Manheim RD2. Hershey is a dairy farmer, cattleman and poultryman who is active in several agricultural and civic organizations and his church.

Behind him in the interest of the fair, as well as a helpmate on their farm, is his good wife Geraldine(Gerry). She's the one who is taking many phone calls these days and, if she doesn't have the answers, must relay the messages.

Anyone who has ever been president of a local fair is aware that a couple weeks before the fair many problems arise which must be solved immediately and the president's wife is usually involved. Mrs. Hershey is just as concerned as Donald in making the fair a success.

Other officers of the Manheim Community Farm Show are Mrs. Martha Weidman, corresponding secretary; Mrs. Cordelia Eisenhart, recording secretary; and Mrs. Glenn Witman, treasurer, as well as several other officers and directors. They meet about four times a year to plan for the fair.

This is strictly an agricultural fair. Last year they paid $5,284.69 in premiums. Livestock and commercial exhibits are housed in tents and other exhibits are in Spahr's garage and in Scout Hall. There are no concessions with the exception of a ferris wheel which is a thrill and a real delight to children as well as adults. Civic organizations and the farm show have food stands and the fire company serves meals.

Exhibits may be entered Tuesday from 7 to 10 p.m. and before 10 a.m. Wednesday, except animals may be entered until noon Wednesday.

Wednesday evening's entertainment, The Spirits of Bluegrass, should start the fair off with lots of enthusiasm and a huge crowd of people. The parade at 7 p.m. will feature bands, floats, fire engines, automobiles, trucks and the exciting announcement of the name of the Farm Show Queen at the reviewing stand.

The lucky girl who is chosen queen will receive a $25 saving bond and a $25 gift certificate. The Manheim Central High School is in charge of selecting the queen, but the announcement is not made until the time of the parade.

This year, there will be a new feature which originated in the Manheim Young Farmers group. It is a small riding tractor (up to 15 horsepower) pulling contest at 8 p.m. There will be three classes in these garden and lawn mower tractors. There is a change of time on the 4-H and FFA Baby Beef Judging It will be held at 5 p.m. Wednesday.

Thursday, the Baby Parade will be held at 6 p.m. This attracts some outstanding entries because it gives nice money prizes. Dairy judging starts at 6:30 p.m. and a musical group will perform at 7:30 p.m. in the area of the tents on Linden Street. The entertainment for the evening will be the Pine Ridge Ramblers.

Hershey was on the Dairy committee of the fair for several years. He has shown cattle ever since he has been farming. He will show about a half dozen animals this year, as well as eggs and some other things.

Their son Larry will show both of his 4-H animals.

Mrs. Hershey, being an expert seamstress, exhibits her sewing. She says "I could pretty well leave everything else go and sew. I find it very fascinating. I took sewing one year in school and took a tailoring Extension course"

She has made dresses, a suit, cape, night clothes and drapes. She plans to enter a dress she made for herself and a dress and gowns she made for her daughter.

Hersheys live on their 100 acre farm on Hossler Road near Manheim borough. Their farm is known as "Hershvale Farm." They have been here 10 years.

Mrs. Hershey's father, Alvin Snavely, owned this farm and farmed it 21 or 22 years. He raised hogs, steers and cash crops on this farm, but Donald turned it into a dairy farm when he took it over. A couple years ago he built a large chicken house. Gerry's grandfather bought it originally, so it has been in the family 35 years.

Hersheys keep 42 purebred Holstein cows and 35 heifers. They raise their calves and sell some stock to other farmers. They are in DHIA. They ship their milk to Inter-state Milk Producers in Philadelphia.

They keep 35 Hereford and Angus steers and 14,000 Leghorn laying hens which they buy at 20 weeks.They get about 12,000 eggs a day at their peak.

They sell their eggs to Pennland Farms at New Oxford, Pa., which is a subsidiary of Plain and Fancy Egg Ranch of Mastersonville. Their eggs are sold ungraded and uncleaned. This is done at New Oxford.

They gather their eggs by hand and put them on egg flats in the crates which are pushed around the chicken house on a cart. Mrs. Hershey and their younger son gather the eggs.

Gerry says she enjoys gathering eggs better than carrying milk, but she likes cows better than chickens. She carried the milk to the milk house until their oldest son was able to take it over.

Hersheys also rent 150 more acres of ground which they farm. Before coming to this farm they lived on a farm one and a half miles south of Manheim.

Donald has always farmed. He is the son of Rohrer Hershey who had a dairy farm in Manheim Township near the Lancaster Airport until three years ago when he retired. His parents now live at Kissel Hill.

Gerry graduated from Manheim Central High School. She has always helped with the farm work. She helps to prepare the soil before planting and runs the silo harvester. She is a good housekeeper and does a lot of canning and freezing of fruits and vegetables. She has done a nice job of antiquing furniture and old objects.

Hersheys have three children.

Their eleven year old son, Larry, is in seventh grade at Manheim Junior High School. He helps with milking and does the baling. He wants to be a farmer. He has one Holstein heifer and one Hereford steer. Both are 4-H animals. He is in the 4-H Dairy Club and the Red Rose 4-H Baby Beef Club.

Stephen is nine years old and a fifth grade student at Sporting Hill Elementary School. He feeds the calves and helps his mother gather eggs.

Patti is five years old and is in kindergarten at Sporting Hill School.

Donald is a member of Manheim Young Farmers which meets once a month in the ag department of Manheim Central High School and on farms. He has served on committees and as vice president and president. He has been a member of the Pennsylvania Farmers Association five years and is serving as a director. He was elected to a three year term on the Farm and Home Center board of directors last January. He is a member of Lancaster County Holstein Association and is chairman of the FFA Holstein Youth Project which awarded a calf at the Ephrata Fair in September.

Donald is a past president and Mrs. Hershey a former secretary of the Sporting Hill Parent Teachers Society.

Hersheys are members of the Congregational Bible Church at Marietta. Donald teaches an eighth grade boys class and Mrs. Hershey assists with a class of three year old children in the Sunday School. The boys sing in a youth choir which organized last spring.

Mrs. Hershey is active in the Ladies Fellowship which meets once a month. She served two years on their workers committee which arranges programs and decorates for banquets and such things.

She belongs to the sewing circle. They meet once a month to make little girls' dresses and quilts for American Missions of Greece. They send their articles to York.

Mrs. Hershey likes to cook. A few of her recipes are:

TASTY BEEF CASSEROLE
Serves 10

2 lb. ground beef
½ cup chopped green pepper
½ teaspoon salt
⅛ teaspoon pepper
2 cans cream of mushroom soup
2 cans tomato soup
2 cups water
12 oz. spaghetti-cooked and drained

Sprinkle with parmesan cheese. Bake at 350 degrees for 30 minutes. This casserole can be frozen.

CHICKEN POT PIE
(A nice covered dish)

1½ cups cut-up cooked chicken
½ of 8 oz. pkg. bought pot pie squares (boiled)
½ cup cut up onion
½ cup cut up celery

Saute onion and celery in melted butter. Add diced chicken.

Add:
1 can cream of mushroom soup
½ can broth
½ can milk

Place all in casserole and top with buttered crumbs. Bake at 350 degrees about 25 to 30 minutes.

BAKED PINEAPPLE

1 can crushed pineapple
½ cup sugar
2 eggs
¼ teaspoon cinnamon
1 tablespoon cornsttarch

Bake 35 minutes in 350 degree oven. Serve warm with a meal, particularly good with ham.

COOL WHIP CAKE
(Very simple to make)

6 egg whites
¾ teaspoon cream of tartar
2 cups sugar
2 teaspoons vanilla

(Continued on Page 23)

Mrs. Donald L. Hershey, Manheim RD2, prepares for the Manheim Community Farm Show by making herself a dress.

Mrs. Hershey and son Stephen gather the eggs from 14,000 hens every day. They will exhibit eggs at the Manheim Fair.

New Health Program Is Discussed at Fulton Grange Meeting

Fulton Grange 66 held a covered dish supper at its hall in Oakryn at 7 p.m. September 27, followed by a public meeting on health care at 8:15 at which approximately 100 people attended.

Master of the Grange, Richard Holloway, welcomed the group and introduced the lecturer, Mrs. J. Stanley Stauffer Jr, who was in charge of the program.

Charles McSparran spoke briefly on "What The Grange Is." The Lancaster Co. Pomona chorus, under the direction of R. Clair Murphy and accompanied by Miss Mary Lou Wesley sang three selections. Mrs. Jacob Fantom and Jesse Wood presented a playlet in three acts "The Expectant Parents."

Mrs. Stauffer introduced Jesse Cutler, chairman of the Southern Lancaster County Family Health Center Committee, who chaired a panel of three of the resident doctors who will practice in the new health center which opened Oct. 1 at Quarryville. Each told of phases and goals of the Center.

Dr. Rogers D. McLane spoke on "Medical Education In Terms of Family Practice." He said "85 per cent to 95 per cent of the doctors now going into practice are specialists and there are very few general practitioners. Family practice is now as much a specialist as surgeons and other specialists. A GP should be an expert in diagnosis." He explained the goal of preventive medicine and the residency program in family practice of the Lancaster General Hospital.

Dr. J. Kenneth Brubaker spoke on "Comprehensive Health Care." Doctors advocate preventive medicine through immunization and physical examinations, he said.

Dr. John A. Wolgemuth spoke on "What Kind of Services Will Be Available in the SLCFHC at Quarryville." There will be five resident physicians, two teacher physicians, one registered nurse and one medical secretary. Regular office hours are 2 to 5 p.m. Monday through Friday and 8:30 to 11:30 a.m. Saturdays. Appointments will be necessary except for real emergencies. The phone number to call is 786-7383.

There will be doctors at the center all the time except from 10 a.m. until 2 p.m.

They have arrangements with other area doctors to take care of emergencies at those hours. This is not an extension of emergency room of the hospital, but it will take care of emergency patients.

They will treat routine illness, pediatrics, adult medicine, obstetrics, routine immunization, laboratory exams, regular blood tests, give electrocardiograms and have some physical therapy there in the office. They will have as much if not more equipment than most doctors' offices.

Each resident doctor will be spending two half days a week at the Center at first, but will increase time spent there if needed. During office hours, there will be two resident and one teacher physician who will be in consultation if necessary. It is thought that each resident will be able to handle about 75 patient families.

The doctors answered many questions from the audience. Each doctor introduced his wife and one child.

Robert P. Reinhardt, department of public relations of the Lancaster General Hospital, was introduced.

In other action, Mr. and Mrs. Clifford W. Holloway Jr were elected alternate delegates to the Pennsylvania State Grange convention to be held October 25-28 at Somerset.

Installation of newly elected officers will be held at the next regular meeting October 11 and the Junior Grange will meet. Their program will be on Hunting and Gun Safety.

To get your free Ponchito pattern which is knitted and crocheted, send self addressed stamped envelope to this newspaper, P. O. Box 266, Lititz, Pa. requesting this leaflet.

Annual Plant

The term annual is applied to a plant which reaches maturity during the first season of growth. After producing flowers and ripening seeds, the plant dies.

Mrs. Hershey

(Continued from Page 22)

2 cups saltine crackers (crumbs)
1 cup pecans chopped
1 qt. Cool Whip or 1 large box of Dream Whip
1 can of Lucky Leaf pie filling (cherry, pineapple, blueberry etc.) as preferred

Beat egg whites until frothy, add cream of tarter and sugar slowly. Beat until stiff. Fold in saltines, nuts and vanilla. Pour into large pan (13" X 9" X 2") and bake at 350 degrees for 25 minutes.

Cool one hour. Put Dream Whip on top and then pie filling on top of Dream Whip. Put in refrigerator. (Graham crackers instead of saltines is good also.)

BAVARIAN CREAM

1 envelope Knox gelatin
1 cup strawberry juice and pulp
1½ cups heavy whipped cream
¼ cup cold water
1 teaspoon lemon juice
½ cup sugar

Soak gelatin in cold water 5 minutes and dissolve by setting in hot water. Add strawberries and lemon juice. Add sugar. Refrigerate till it begins to thicken then add whipped cream.

Health Fund Drive Passes $10,000

170 Progressive Parties for the benefit of the Southern Lancaster County Family Health Center have been held as of September 27. A total of $2577.08 has been turned in through them.

These parties are still being held. More money is needed to fund the Center equipment and renovation, so area residents are urged to continue them.

Jesse Cutler, health center chairman, announced Monday that the fund drive is $9,700 short of its $20,000 goal. He emphasized that the contributions have been voluntary, but stressed that the need for funds is now.

He asked that individuals and organizations having donations for the Family Health Center get them in as quickly as possible.

The following have held parties in the past two weeks: Mr. and Mrs. Clair DeLong, Mr. and Richard Bittinger, Thurman Morris, Mr. and Mrs. Robert K. Rohrer, Mr. and Mrs. James A. Hess, Mr. and Mrs Edward Zawiki, Mr. and Mrs. Glenn D. Meyer.

Mr. and Mrs. Carl M. Johnson Sr, Mr. and Mrs. John Hershey, Mr. and Mrs. Charles Long, Mr. and Mrs. Earl Metzler, Mr. and Mrs. Howard Groff Jr, Mr. and Mrs. Donald Kreider, Mr. and Mrs. Jason Weaver, Mr. and Mrs. James B. Miller, Mr. and Mrs. Kenneth C. Ostberg, Mr. and Mrs. William R. Boyd.

Mr. and Mrs. Roland L Erb, Mr. and Mrs. Howard Fisher, Mr. and Mrs. Gary B. Aukamp, Mr and Mrs. Howard Coates, Mr. and Mrs. Martin Eshleman, Mrs. Rebecca Quinn and John Galbreath, Mr. and Mrs. James Fisher.

Mr. and Mrs. Thomas Galbreath, Mr. and Mrs. James Landis, Mr. and Mrs. Stanley Kreider, Mr. and Mrs. Harold Alexander, Mr. and Mrs. Samuel Groff, Mr. and Mrs. Russell Adsitt.

There were donations other than parties in the amount of $172 in the past two weeks.

HOW MANY PANS DO YOU NEED?

If you're selecting new cookware you'll want to buy pans of good quality which will last for many years of constant use You'll probably find it more satisfactory to select individual pans than a whole set. Extension home mangement specialists at The Pennsylvania State University say what you need depends on you - your family size and cooking habits Most brides, beginning cooks, and small-family homemakers find that a large, medium, and several small saucepans, a large and small frypan, and a Dutch oven are adequate. Other sizes and styles can be added as needed and permitted by storage space.

Fix-It Tip

The mender for a rubber garden hose is usually a short tube or nipple with a clawlike metal flange around the middle. The tube is inserted in both ends of the hose and the metal prongs pounded down. Some menders are nothing more than the brass tube, held in place with separate hose clamps.

Potato Output Is Down

The 1971 forecast for Pennsylvania potato production is 7,665,000 cwt., a seven per cent decrease from last year's production. Yield from the 36,500 acres planted is expected to average 210 cwt. per acre, down 12 per cent from the 1970 average yield and about one per cent below the recent 5-year average production.

Pennsylvania potato growers are not expecting as high yields from this year's crop as were experienced last year.

Digging of the early varieties is about completed and yields are reported low This is a result of the dry conditions during the months of June, July and August

Virtually all areas of the State reported dry conditions which hampered tuber growth Most counties, especially in the north, reported light tuber set with reports of below average tuber size not uncommon Although size and set of the tubers have been below average, the quality of the early varieties is said to be good.

Blight is present in scattered areas but is not a serious problem at the current time. Aphids are reported in some counties but are under control due to spraying.

U. S. Output Down

Nationally, the first forecast of the 1971 fall potato crop places production at 246,860,000 cwt., two per cent below the 252,774,000 cwt. produced in 1970, but four per cent above the 238,475,000 cwt. produced in 1969.

The 1971 fall acreage for harvest is estimated at 1,077,600 acres compared with 1,086,900 acres harvested last year. An expected yield of 229 cwt per acre is below the 233 cwt. per acre harvested in 1970. Final outcome of the 1971 crop will depend on the growing conditions during the remainder of the season.

The eight Eastern States expect a fall crop of 61,952,000 cwt., one per cent below 1970 and about the same as 1969. The expected average yield for the area, at 241 cwt , is down compared with the 1970 crop yield of 243 cwt.

Farmers Union Urges New Grain Policy

The national board of directors of the Farmers Union is asking for early announcement of a new national program for feed grains in 1972 to correct economic and production imbalance resulting from the 1971 program.

The national president of the Farmers Union, Tony Dechant, said the board, meeting yesterday in St. Paul, Minn., recommended a price support loan for corn of at least $1.35 per bushel and comparable rates for other feed grains in 1972.

The board also urged return to acreage allotments based on 50 per cent of the base acreage for feed grains, along with diversion payments for acreage retired from feed grains production-all of which is authorized under the present law. This would mean scrapping the so-called "set aside" land retirement plan preferred by the Nixon Administration, Dechant said.

The Farmers Union board said that the more than five billion bushel corn crop, and market prices in producing areas of 90 cents per bushel is causing severe economic hardship throughout the feed grains producing states of the nation.

In addition to the reduction in production for 1972, the board recommended early passage of legislation to provide for three-year storage under the loan program.

The board also said that strategic reserves should be established for feed grains, wheat, soybeans, rice, peanuts, milk products, and cotton in quantities of at least 25 per cent of average national production. Such reserves should not be released at prices below 100 per cent of parity, the board said.

Legislation which would accomplish both these objectives is presently under consideration by the House Agriculture Committee.

Hog Farmers Project Lower Farrowings

"The nation's hog farmers are to be complimented for their good judgment and restraint in planned farrowings of pigs this fall and winter," U S. Secretary of Agriculture Clifford M Hardin said recently

The USDA September Pig Crop Report for the 10 Corn Belt States indicated last week that hog raisers will farrow 11 per cent fewer litters in the September-February period this fall and winter

"If farmers will hold to these reasonable levels of pork production, they can enjoy brighter income prospects next year, and there will still be ample supplies of pork for consumer use," the Secretary said

A year ago farmers increased their fall farrowings by 20 per cent over the previous year When these larger numbers of pigs reached the market, the heavy increase in pork depressed farm prices. The USDA bought a record amount of pork over several months to try to bolster the hog market, but prices at the farm responded only moderately due to heavy supplies

"I hope that all hog producers will stick to their plans and hold farrowings this fall to the modest levels indicated in yesterday's Pig Crop Report. This kind of self-help is the best program possible for hog producers-and it is a program that every hog producer can participate in voluntarily," Secretary Hardin said.

Crespo Promoted at Weaver

Antonio Crespo, 213 Grant St., New Holland, has been promoted to a supervisory position in the Prepared Foods Division of Victor F. Weaver, Inc., New Holland, according to an announcement recently by Lester B. Weaver, plant superintendent.

Crespo joined Weaver in 1970 and has currently been serving as a group leader in the special production department.

In his new position as assistant foreman, Crespo will be responsible for assisting in the supervision of the Batter Dipped operation.

Consumers Want to Know

by MARGARET SPADER
Director of Consumer Affairs
National Association of Manufacturers

What is a trash masher?

Garbage may be put into this new appliance, but foods that might cause excessive odor such as fish, onions, etc., should not be added. The trash masher compactor is designed to handle cans, bottles, plastic containers and paper.

What are the basic advantages of this new kitchen appliance?

It saves on frequent trips to the trash can and on the number and size of trash cans needed in the home. The trash masher compactor will hold a week's worth of trash for the average family of four. The trash is compacted into a rectangular bag, 16 x 16 x 9 inches, which holds the equivalent of about three 20-gallon trash cans.

What are the installation requirements?

The trash masher compactor is designed to fit the same space as a 15" kitchen cabinet. A 120 volt, 15 amp fused normal household circuit will do, (subject to local codes). Four leveling legs come with the unit. It requires no drains, no vents, and no special wiring or bolting.

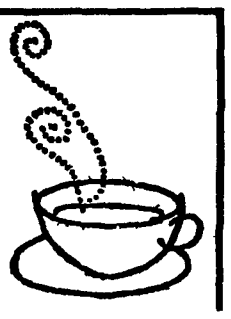
Is the trash masher compactor expensive to operate?

Basing power consumption on 10 cycles a day, the trash masher compactor costs less than one dollar per year to operate in most parts of the country. Bags cost around 30 to 35 cents each and spray can be purchased for under two dollars a can. A normal household will use about a penny's worth of spray a day.

How does the trash masher compactor operate?

Each time you have an item of trash—a can, bottle or carton—drop it in, shut the drawer and press a button. A ram, driven by two power screws, descends under 2,000 lbs. of force to compact the waste. Waste should be compacted each time something is added to the drawer to increase compacting, allowing you to get more into the unit.

Ladies, Have You Heard?



By Doris Thomas, Extension Home Economist

CARPET RUG CARE TIPS

When carpet or rug pile is crushed down because of furniture pressure or traffic, try a steam iron or a hot iron over a damp cloth. Hold the iron above the pile and avoid pressing the pile with the iron.

After this treatment, brush up the spots gently. It may take two steamings to restore deeply crushed areas.

Give carpeting or rugs in heavily traveled spots a rest. Move furniture occasionally and reverse the rugs.

Use a rug in front of doorways, chairs, or furnishings if the rug is soft. But don't use an extra piece of carpeting for this purpose The hard surface backing will tear your carpet fibers

To improve the appearance of charred spots due to cigarette burns, use small, sharp scissors and carefully clip off the blackened ends of tufts Then apply a small amount of this solution you can make. Use a teaspoon of neutral detergent — one that's recommended for fine fabrics — and a teaspoon of white vinegar to a quart of warm water. Blot with white absorbent tissue. Dry, and brush the pile back into place.

Doris Thomas

If the color of your carpet or rug appears dull, this doesn't necessarily mean it's fading. It can mean the floor covering is getting a soil film which needs professional cleaning to remove. If your new carpet or rug shows this dimming, treat it with an absorbent powder cleaner.

The first few times a new carpet or rug is vacuumed, the vacuum bag will probably contain a lot of fiber fluff It's normal for the fluff to show up on the surface of new carpets and rugs. And fluff doesn't affect their life or quality.

Proper care of your carpet or rug helps insure a longer wear-life And you'll be protecting your investment

Denim Is In Fashion!

Next time you see a college student wearing denim pants and jacket, don't be too quick to criticize — especially if you happen to be a parent of a teenager or college student.

Many parents are finding out that the cheapest thing on the "must" list for a college student these days is clothes That's because the uniform of the day at many colleges and universities is made of denim — one of the oldest, least expensive, and most serviceable of all fabrics

Unlike other clothes, the older denim gets, the more "in" it is as a collegiate fashion

Only a few years ago, denim makers were facing a real problem Somehow, blue jeans were identified as the uniform of juvenile delinquency As a result, many school officials throughout the country prohibited students from wearing denim clothing.

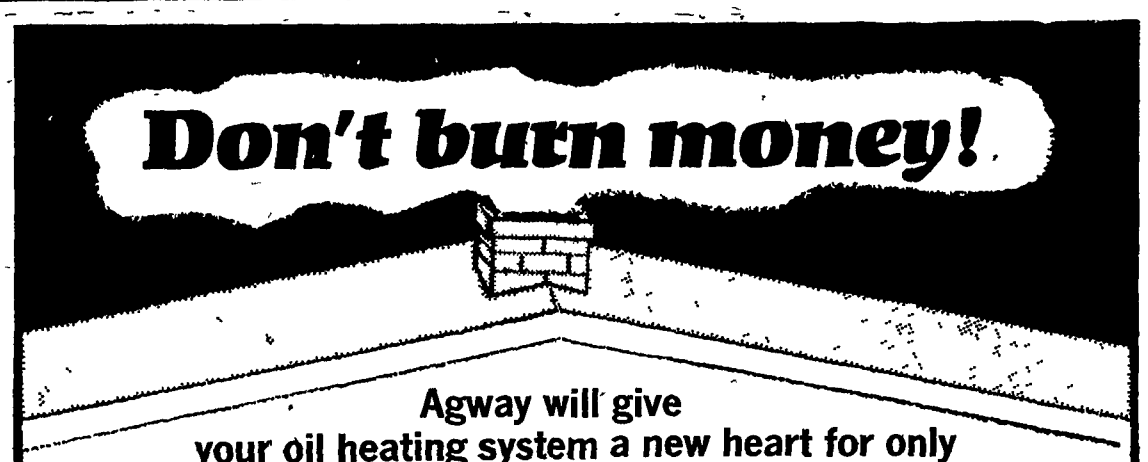
In an effort to convince the public that denim was a respectable fabric, denim makers formed the Denim Council. One of the first things manufacturers did was to start modifying the fabric.

They added new colors to the basic blue. They created prints and ultimately, new surfaces for the fabric itself. They even made stretch denim. And what happened? School officials relented, but the kids went back to basic blue.

Exciting new denims are now a part of one of the wildest fashion rushes of all times

You'll find denim at the top of the list in all kinds of clothing. And accessories, too, such as denim gloves trimmed with white calf and shoestring lacing, denim boots, shoes, bonnets, hats and bags

Don't burn money!



Agway will give your oil heating system a new heart for only

You're burning up money every winter if your oil burner won't hold its tune, needs constant repairs, frequent service. For only $169.95 plus tax Agway's expert servicemen can install a new Model 40J burner, including a new primary control in just a couple of hours.

$169.95 plus tax

And this is a quality burner that's generous with heat and miserly with fuel. It quickly pays for itself with what it saves you on fuel, repairs, service calls.

Call Agway today and modernize with a new oil burner package. You'll bring down the cost of winter.

Call Agway Petroleum today. And bring down the cost of winter.

Penn State Scientists Study Ways to Improve Livestock Output

Scientists at Pennsylvania State University are developing ways to increase and improve livestock production without polluting the environment.

The approach is to re-cycle animal wastes as livestock feed, according to Dr. B. R. Baumgardt, head of the Department of Animal Science.

Both animal wastes and most horticultural wastes can be safely and effectively fed to cattle and sheep, Dr Baumgardt stated recently at an open house held by Harvestore in Dillsburg. Dried poultry waste can be re-cycled through cattle and sheep--or can be used as a source of protein replacement, he added.

Waste paper and wood by-products, while not high in nutritive value, can be used as roughage in rations for cattle and sheep In some cases, animal wastes are being re-cycled directly to give the animal's digestive enzymes a "second crack" at nutrients they missed the first time around

Research will be continued to develop improved techniques of waste management, which Dr. Baumgardt termed a major challenge facing animal agriculture

As of now, aerobically digested soft garbage from municipal sewage treatment plants is being studied as a potential animal feed source.

A second challenge facing animal agriculture, he said, will be to devise complete systems for an expanded livestock feedlot industry. This should include systems to handle re-cycling of horticultural and animal wastes as well as methods to utilize conventional forage and grain crops in varying rations. Improved waste disposal systems for feedlots will likewise be needed.

Developing systems for producing more local feeder animals is a third challenge, he pointed out. In all probability, there will continue to be an 8 to 10 dollar trucking cost per animal from midwestern feed lots to eastern packers. A proportionate charge exists for shipping carcasses. Such shipping costs should serve as a stimulus for producing more feeder calves in Pennsylvania, Dr. Baumgardt suggested.

A fourth challenge, he observed, is to evolve more readily available financing systems tailored to animal production. He urged bankers and similar persons to learn more about the profit potential for animal agriculture.

August N.Y.-N.J. Milk Price Is $6.27

A uniform farm price of $6 27 per hundredweight (46 5 quarts) will be paid dairy farmers for August milk deliveries to pool handlers in the New York-New Jersey milkshed, A J. Pollard, market administrator has announced

They got $5 92 in July and $6 15 in August 1970

The butterfat differential was set at eight cents for each tenth of a pound of fat above or below 3.5 per cent

Dr Pollard reported that receipts from producers were up 9,572,013 pounds to 831,497,862 pounds compared with the same month last year Sales of fluid milk products (Class I), for which handlers paid $7 17 per hundredweight, fell 3,092,250 pounds to 417,374,700 pounds and made up 50 2 per cent of the pool

There was a decrease of 1,285 to 25,107 in the number of dairymen in the pool, he said, but average daily deliveries per producer increased 63 pounds to 1,068 pounds

The number of dairy farmers with bulk tanks, however, rose 1,458 to 18,383 Receipts from tank producers increased 59,426,518 pounds to 700,340,742 pounds, or from 78 to 84 2 per cent of the pool

A total of 368,767,248 pounds of tank milk---52 7 per cent of tank receipts--was used as Class II and subject to the transportation credit, which amounted to $368,767 29

August's pool was based on reports from 136 handlers, a figure not comparable with last year, the administrator explained The number of bulk tank units dropped by 18 to 217

The farm value of pool receipts totaled $52,388,383 73, Dr Pollard said This includes all differentials paid under the orders

All prices quoted are for milk of 3 5 per cent butterfat received in the 201-210 mile zone from New York City

Measure Annual Tree Growth

Check annual growth of your trees to determine how well you are caring for them, says Craig S. Oliver, Extension Ornamental horticulturist at The Pennsylvania State University With adequate water, fertilizer and root growth, younger trees should show from 9 to 12 inches of new twig growth a year Mature trees will produce from 6 to 9 inches of new growth annually If your trees are making average or better growth, you're doing a good job.

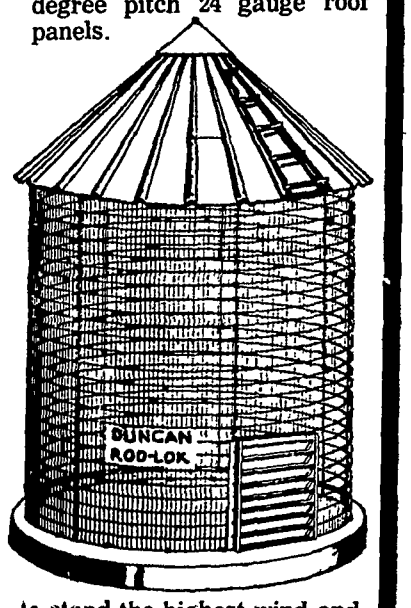
DUNCAN CORN CRIB

Rods Slide Quickly Into Place . . . Lock Panels Into Unbroken Cylinder Of Galvanized Mesh!

NOW, you can own a permanent, lifetime, all steel mesh corn crib for less than the cost of many temporary cribs . . . have all the strength and anti-rust characteristics the galvanized mesh can have. Using the Interlocking joint panel connections you quickly hook together and lock with rods . . . creating an unbroken cylinder of 2 or 5-gauge steel mesh with the ability to stand pressures and strains far in excess of any which may be put upon it under normal use.

The simple "J-bolt" method of attaching the steep roof to the mesh uses the inherent strength of each to reinforce the other. A generous 6 inches of overhang has been provided for greater protection. Interlocking sheets of heavy gauge metal give the "Rod-Lok" Corn Crib roof strength

High pitch roof approx. 45 degree pitch 24 gauge roof panels.



to stand the highest wind and hold the heaviest snowfall. Top cap and half panel on roof removable for easy filling. Large slat door opening. Slats not furnished for door.

Farm Women Societies

Society 5

Society of Farm Women 5 met Saturday at the home of Mrs. Anna Spahr, East Petersburg. Devotions were given by Mrs. Elmer Spahr and her son, Vincent.

Donations were given to the United Campaign. It was decided to pack fruit baskets at the home of Mrs. Elsie Stehman on Nov. 23, for Thanksgiving to be given to shut-ins.

Society 27

Farm Women Society 27 met September 28 at the home of Mrs. Sam Heineman III, Marietta RD1. Cohostess was Mrs. Harold B. Frey. There were 28 members and six guests present.

Three workshops were featured, including pressed flowers under glass by Mrs. James Garber, dried flower arranging by Mrs. Wayne Miller, and pressed flowers on note paper by Mrs. Russel Swarr. These talented women are all members of Society 27. Many beautiful creations were fashioned at this workshop meeting.

During the business portion of the meeting election of officers was held. New officers include Mrs. John Henry Wolgemuth, vice president; Mrs. Lester Good, treasurer, and Mrs. John M. Nissley, corresponding secretary.

Mrs. Witmer Sherer led devotions.

Mrs. Galen Benner will be in charge of a food stand at the public sale of Albert Habacker on October 16. Members of Society 27 will be preparing many homemade food items to be sold.

The next meeting will feature "Ladies Day Out" and will include a tour of the Governor's Mansion and the State Capitol as well as shopping at the Harrisburg Mall.

Society 9

Farm Women Society 9 met recently at the home of Mrs. Paul Swearingen, Willow Street. Guest speaker, Mrs. Charles Fink, demonstrated the making of wreaths and trees from pine cones for the holiday season.

Mrs. George Trout, Mrs. Paul Zercher, and Mrs. Harold Kauffman were assisting hostesses, with Mrs. Zercher in charge of devotions.

During the business portion of the meeting conducted by Mrs. Edward Brenneman, president, plans were set for a bus trip to the Andrew Wyeth Museum, Hagely Museum, Hopewell Village and St. Peter's Village, on Oct. 7. Reservations and information is available from Mrs. Brenneman, 914 Penn Grant Rd.

She also announced that a few tickets are available for the evening with Nan Wiley on Oct. 1 at Centerville Junior High School Auditorium, a program sponsored by the Lancaster County Farm Women.

The next meeting will be held on Oct. 14 in the social room of the Colemanville United Methodist Church, beginning at 9:30 a.m. to make bed pads and pillows for cancer patients.

Dessert will be served at 12:30 p.m. by Mrs. Clarence Carter, Miss Clare Gardner and Mrs. William Gring, hostesses, preceding the regular business meeting of the group.

Society 4

Farm Women Society 4 entertained Society 12 recently at a covered dish dinner in the Hempfield United Methodist Church.

"The Romance of Glass" was presented by George Scattergood.

A new member, Mrs. Charles Newcomer, Mountville, was installed.

The next meeting will be held October 23 in the home of Mrs. Henry Reist.

Ida's Notebook

Ida Risser

The calendar tells us October is here. Many leaves have fallen and we know there are many more to fall as the cool weather approaches. It is an especially nice time for corn and doggie roasts.

As a youth, I participated in a Community Treasure Hunt which ended in a meadow. The group of boys and girls walked about five miles to our destination After an evening of singing around the campfire, we tramped back all those miles to our car

Ironically, we had the campfire just across the Conestoga from our own farm. But a hike under a harvest moon can be fun too

* * * *

Another of our tall sons is off to learn the intricacies of college life on a campus of over 27,000 students.

His grandfather clock chimes every quarter-hour as a reminder of its owner.

It is almost as hard to let them go out into the world on their own as it is to bring them into it in the first place. Time marches on!

* * *

Have you considered the possibilities of having a terrarium this winter? Of course, I always called mine a winter garden

It is ideal for the person who is a bit careless about watering their plants.

Only a few plants are needed to make an attractive planting in a bowl It is fun to get tiny ferns and several kinds of moss and watch them grow under a glass cover or a cellophane material.

A partridge-berry will add a lot of color, but is rather difficut to find.

A broken bit of mirror can be used to simulate a pond Add a plastic animal or two and you have a miniature woodland to give you pleasure

Farm Women Calendar

Saturday, October 2

2 p.m. - Farm Women Society 6 meets.

1:30 p.m. - Farm Women Society 2, home of Mrs. Roy Shelly, Elm. Farm Women Society 10, 40th Anniversary Celebration.

Textured Knits Dicussed

Textured knits in a wide range of apparel items for the whole family are receiving a high degree of consumer acceptance today, according to Miss June Wilke, Chester County Extension home economist.

Textured knits of polyester, nylon, triacetate and acetate are ideal for the person who leads an active life In order to take full advantage of all the best features of these fabrics, it is important to know how to take the best care of them. Garment labels often give information on cleaning the garment. There are now some manufacturers who have cloth labels sewn in the garment so the information stays permanently visible, Miss Wilke said.

Textured acetate knits must be drycleaned with touch-up pressing on the wrong side between cleanings, if necessary. If a garment must be pressed on right side, use a press cloth and low iron setting.

Hand washing is preferred for triacetate knits. Fabric softener added to the final rinse will reduce static electricity Drip dry Steam press on wrong side to prevent fabric from becoming shiny.

Textured polyester and nylon knits both may be machine washed and tumble dried, unless trimmings, linings or styling call for dry cleaning. Remove grease and oil spots by treating with liquid detergent before laundering.

Hang textured knits on padded hangers or fold flat in drawers.

Maintain growth & weight gains

FEEDER CATTLE HEALTH PROBLEMS?

AGWAY HAS THE ANSWERS!

STRESS and SHIPPING FEVER COMPLEX: Feed Aureomycin S700 Crumbles 1-6 lb.-head-day for first 28 days to reduce effects of shipping fever and maintain appetite, growth and weight gains.

MAINTAIN GROWTH and WEIGHT GAINS: Feed Aureomycin Crumbles (2 gm.-lb.) 1 lb.-20 head-day to prevent foot rot and liver absesses and reduce bacterial diarrhea and maintain growth and weight gains.

SCOURS and SHIPPING FEVER: Drench with Sulmet 12.5 percent solution; For winter dysentery (bloody scours) use Agway Diarrhea Bolus.

GRUBS: Apply Coral 4 percent Pour-On in Sept. or Oct. to prevent damaging effects of cattle grub larvae.

WORMS: Treat cattle on arrival with Thibenzole Bolus, Drench or Top Dress Pellets.

PINK EYE: Treat cattle with Agway Eye and Wound Spray.

FLIES and LICE: Hang Agway 3 percent Ciodrin Dust GBags in feed lots or pasture, or spray with Agway Ciodrin Concentrate.
